

Aquatic Consultants Inc.

"Your Lake & Stream Experts"

July 11, 2020

As part of our normal monthly maintenance, our biologists and technicians visited the water resources at Deer Lakes HOA on the following date(s):

06/24/2020

Your lakes were assessed for aquatic vegetation problems, water quality was monitored, and overall lake condition evaluated. Following are the results of the monitoring and any subsequent treatments or management actions:

Trout Pond

June 24 - No healthy surface algae or chara was present during this visit. Some bottom algae and water knotweed was present but could not be treated during this visit due to the low dissolved oxygen (5.16 mg/L). Fish that were observed were active and appeared to be healthy.

We will return in July to perform our scheduled lake management and maintenance. If you have any questions or concerns, please contact me at (505) 681-2500. Thank you again for your continued confidence in our company.

Sincerely,

Jake Shandler, Fisheries Biologist
