

CT – ROTATING CASING SCRAPER

TOOL APPLICATIONS

Obstruction-free casing is critical for the efficient operation of many downhole tools during drilling, fishing, completion, or wireline jobs. The Casing Scraper removes rust, scale, cement, mud, bullets, paraffin, perforation burrs and other obstructions or foreign material from the inside walls of casing.

Casing Scrapers are available to condition pipe ranging from 2-7/8" to 3-1/2" Tubing

Maintaining a clean casing I.D. is important when operating drilling, fishing or wireline tools. Likewise, packers, patches, spears, and similar tools require clean surfaces to grip. Obstructions on casing walls frequently cause these tools to fail or become difficult to operate.

FEATURES AND BENEFITS

- Clean out paraffin, hardened cement, and mud.
- Remove burrs from perforations.
- Remove imbedded bullets from casing.
- Remove burrs and nicks caused by bits or fishing tools.
- Remove tight spots in casing caused by dents from tool mishandling

SPECIFICATIONS

Technical Variable	Units	Casing OD	
		2-7/8"	3-1/2"
Collapsed	in	2.347	2.597
Extended	in	2.797	3.047
Connection	Top	Pin	1"AMMT
	Bottom	Box	1"AMMT
