

# **BECOIN Protocol “WhitePaper”**

## ***"WE ARE ALL BECOIN"***

Welcome to **BECOIN**. We believe in transparency, trust and loyalty.

As we all see in the crypto-world lots of new tokens are popping up every day, some trusted and some are not. The true vision of **BECOIN** is grow a trusted community and belief in the Token where we can take it to the second step. Surely, we want all our holders to make money but more important is the vision behind the money.

**BECOIN** potential is extremely high due to the below Tokenomics and distribution system. We have all-new one of a kind “\*\*\*\*\*” in stored for you and we will be talking about that in the near future.

### **Tokenomics**

Type	NUMBER	SHORTHAND
Total Supply	1,000,000,000,000,000	1 Quadrillion
Liquidated Supply	50,000,000,000,000	50 Trillion
Contract Launch Supply	500,000,000,000,000	500 Trillion
Reserved for Airdrops & Prizes	300,000,000,000,000	300 Trillion

### **BECOIN Protocol**

**BECOIN** has 2 simple functions:

Reflection + Liquidity In each trade, the transaction is taxed a 10% fee, which is split 2 ways:

- **5% fee = redistributed to all existing holders**
- **5% fee is added as a liquidity pair on Pancake Swap which is BECOIN/BNB**
- **The liquidity pool has been locked with Mudra Lockers for two years.**

## Manual Burns

Sometimes burns matter, sometimes they don't. **BECOIN** team does not believe in the early stage burning process just to reduce the available quantities. The burn idea has been pasted around from one token to another and it's a copy past strategy now. Let's take **BECOIN** to the next level and have other tokens copy us!! While burning is not an option now, we will consider all aspects that reflect the future of the token in the Whitepaper 2.0 ( which we can't stop talking about and brainstorming around the offices) that being said, for now NO burning will happen and trust us when we say – burning doesn't always drive the price up.

## Automatic Liquidity Pool (LP)

As we have mentioned, our main liquidity pool which receives 5% on every transaction is locked for two years (certificate link is available on [our website](#)) we are still experimenting on another liquidity pool that will not affect the holders or / and will not be taxed extra but all holders will benefit from this pool on a yearly basis (again, more details will be in whitepaper 2.0).

## How to buy

Mentioned in our website, following the steps below will guide you through the process:

1. Download trust wallet and open an account (remember to write down the 12-word safe key and never share it with anyone).
  2. Copy our token address and add it to your token list.
  3. Go to **dApps** from trust wallet app and scroll down to **Pancakeswap** and buy our token using any major coin (most people use BNB).
  4. Hold and enjoy the profits.
