

**Waterford Waterway Management District
Agenda
Thursday October 28th, 2021 at 7PM**

This meeting will be held in person at the Waterford Town Hall and online using Zoom

1. Call to Order 7 pm. Greg, Margaret, Grant, Bill, Scott, Dan, Alex present.
2. Review and act on:
 - a. 9/25 Monthly Board Meeting Minutes. Dan motioned to accept minutes. Bill seconded. Motion passed 7-0.
3. Review and act on Claims-October 2021. Margaret motioned to have claims approved. Grant seconded. Reminder for commissioners to have claims submitted by Friday before the monthly meeting. Approved 7-0.
4. Correspondence.
5. Reports
 - a. Commission
 - i. Chairman's - Report attached.
 1. Addressed commissioners goals. Will revisit in November.
 - ii. Aquatic Plant Management-Report attached.
 1. DNR grant not available in time to purchase harvester for the Summer 2022. Looking to lease a harvester once again from Aquarius.
 2. Bill motioned that the WWMD enter into a contract with Inland Lakes Harvesters to purchase modifications to the trailer/conveyor not to exceed \$4,500.00 to allow for remote operation. Alex seconded. Approved 7-0.
 3. Off-loading site development. Bill presented background information on ownership and permitting of the proposed Bayside launch site. Bill motioned that the WWMD apply to the WI DNR for the Bayside Launch permits. Margaret seconded. Alex Margaret Grant Dan and Bill-Yes. Scott- No at this time. Scott would like to seek more direct neighborhood engagement and feedback before taking action on this site. Motion passed.
5-1
 - a. Discussion on alternative sites. Additional gates to prevent road vehicle access. 6 or 7 other locations were evaluated and determined to be not feasible due to terrain, road issues(unable to maneuver equipment) and excessive expense to make it usable. This is a very strategic location. Scott expressed concerns about the level of activity expected at the launch and the impact on the neighborhood. Bill explained the limited activity based on the weed harvesting schedule and addressed noise and odor concerns. Alex noted improved fire department access to water. It was also noted that

according to the zoning head of Racine County, this property is the property of the Town, and not the subdivision, and that it was trusted to the town back in 1977. The town will have jurisdiction over the property. For the WWMD to be able to do anything there it will require the approval of the DNR through the permitting process.

i. Public Comments:

1. Julie Limberg. 4831 Riverside Road.
Most neighbors do not want the launch.
 - a. Bill responded the process involves the DNR and the County and concerns could be addressed with those agencies.
 - b. Greg noted that we have tried to include everyone in the decision and be transparent.
 - c. Grant noted the truck that will be hauling away lake weeds is a pickup truck with a trailer driving slowly.
 2. Scott Limberg. Frustration over how far the process is without including the neighborhood.
 - a. Bill: This motion is all part of the research. The DNR will have an opportunity for public input.
 3. Sharon Webb. 5011 Bayfield Dr. The neighborhood is under the assumption that this is community property.
 4. November 12 open forum with the DNR on how to improve the waterway.
- iii. Treasurer/Finance - Report attached
1. Audit will begin in November and finish in January.
 - a. Margaret: Motion to renew two quickbooks subscriptions at \$249 plus tax. Alex seconded. Approved 7-0.
 - b. Greg noted we are in a better financial position than budgeted.
 2. Margaret also addressed the requirement that all claims be submitted to her by the Saturday before the monthly meeting so that she is able to properly complete the reports she needs to generate. If claims are not received by that time they will then need to be included on the next months reports
- iv. Information and Education/Marketing - Report attached
1. Commissioners Email Program was reviewed. All commissioners will need to activate their WWMD email addresses
- v. Legislative-Report attached
1. Federal funding will have to be attained in an indirect manner. WWMD is not eligible for direct funds. Grant writing needs to be researched. Greg noted WWMD asked the town for \$75000 in funding through the ARAPA funding opportunities that the town is applying for under the Shoreline Restoration opportunity
- vi. Navigation Access/Hydraulic Management - Report attached.
1. Bill asked what the depth of the channels is proposed. Grant: 1.5 depth improvement.

2. Greg would like to aim for February for a riparian owner meeting regarding dredging. Grant agreed that this made sense
 3. Grant has been in touch with the FRC for funding.
- vii. Special Projects-Report attached
 1. There are steps yet to be completed for special projects. Will work with the county.
- b. Approval of Commission Reports. Greg motion to approve. Margaret seconded. Approved 7-0.
 - c. Volunteer/Event Committee development-
 - i. Lynn Baumann is unable to currently lead this committee and there is no activity to report.
 - d. Regulatory
 - i. Town of Waterford - Bill - No report
 1. Greg did offer a brief overview of the Town's incorporation efforts as heard on the State Board of Review Call Thursday morning. The was found to not have met 4 of the 5 standard requirements as outlined by the board. Next step to be presented to the Racine Circuit Court for final determination
 - ii. Village of Waterford - No report
 - iii. Fox River Commission - Grant: Asking \$50000 for dredging.
 1. Greg. DNR and FRC notified of Floating Bog in Conservancy as it is beginning to encroach on the river
 - iv. C.A.U.S.E. - Potential to receive ARP funds or donations through their 501c status.
6. Previous Business
 - a. Follow up on annual meeting items
 - b. Previous business covered under specific committee reports
 7. New Business
 - a. Review of Grant Writing support proposal.
 - i. Will not be addressed today.
 - b. Review motion for monthly meeting day/time change
 - i. Bill presented a motion that the WWMD change its monthly meeting day to the fourth Wednesday of each month as well as changing its meeting time to 6:00 PM, this change will take place in January 2022. Margaret seconded. Approved 7-0.
 - c. November Meeting Date-Nov. 18th No Meeting in December
 - d. Public's opportunity to address thoughts and ideas
 - i. Doug: comment about proposed Bayside launch saying he remembers when this was used by everyone and that it should be considered
 - ii. Mike Barrett also commented about the proposed Bayside launch and other harvesting and dredging comments.
 8. Scott motion to adjourn. Grant seconded. Approved 7-0. Meeting adjourned at 9:05 pm.

**Waterford Waterway Management District
Agenda
Thursday October 28th, 2021 at 7PM**

**This meeting will be held in person at the Waterford Town Hall and online
using Zoom**

1. Call to Order
2. Review and act on:
 - a. 9/25 Monthly Board Meeting Minutes
3. Review and act on Claims-October 2021

Dear WWMD Board of Commissioners,

We feel so grateful and honored that you provided a portion of the funding for Barb's bench, as she was a founder of the district. This incredible gift will help keep her memory alive. We placed the bench on the shoreline of Lake Tichigon, as that was one of her most favorite places. Thank you again for your prayers, generosity and thoughtfulness.

The Barons & McGinnis

WWMD

Chairman's Report

October 28th, 2021

- **Parcel Review in conjunction with Racine County to bring the current tax role in line with actual properties on the watershed as previously reported. Letters have been sent and thus far only two inquiries.**
 - **Adjustments review and completed on the properties Zoned C-1 exempting them from the fee structure through the updated Exemption policy**
 - **Communicated with the affected owners advising them of the exemptions and the terms on the exemption**
- **Updated Resolution letters with the County, Town and Village reflecting the revisions to the Special Charge fee structure as approved at the annual meeting**
- **Processed information with the Town of Waterford to include the WWMD as a part of the Relief Assistance Funding Program in an attempt to get funding for Storm Water Run-Off projects**
- **Consider further discussions with Foth staff for the Grant Writing support and consideration.**

A proposal to address is being generated for the commission to consider and vote on for approval.

Ideas for Grants:

1. **Aquatic Plant Harvester**
 2. **Small Scale Dredging (Grant, I know we were told that there would be no money available from the state however maybe they can weigh in with Regional or Federal grant consideration)**
 3. **Funding for Launch Development and Construction Sites (Gravel, Concrete, Road enhancements, etc.)**
 4. **Shoreline Restoration and Erosion Control**
 5. **Dredging support costs (Engineering, Survey's, etc.)**
 6. **AIS Treatments and Abatement (Environmental consideration as this addresses Invasive Species issues)**
- **Develop the Goals/Objective for 2022**
 - **Begin coordination of a succession planning effort for each committee to establish support for each commissioner in their duties**
 - **Reviewing the development of a Lake Citizens Advisory Committee for added support on projects ahead of us**

- **Reviewing possible consideration to attend the States Wisconsin Lakes and Rivers Convention on April 6-8 in Steven's Point. The theme is "Protecting What We Love for the Future". Would be a good consideration for a member of the board to attend.**

APM Committee Report

October 28th, 2021

APM Chairman: Bill McCormick

Harvesting Equipment – Winterization:

The Transfer barge was winterized by the manufacturer Aquarius Systems in North Prairie, WI, we exceeded the budget estimate due to the fact that they found the hydraulic oil in the 45-gallon reservoir needed to be changed out, which added approximately \$1,600.00 to their original estimate. We also had to have them order in a new wench control as the old one did not work.

The barge was transported by PJ's towing located in Franklin on 10/22/2021 and made it safely over to Eagle Lake Association for winter storage in their storage facility as part of our lease agreement.

The Eco-Harvester has been in the possession of Silver Mist the manufacturer in Waupaca, WI and I'm currently working with them to have them wrap up the repairs to the drive roller as well as complete the winterization. Dealing with the Silver Mist organization has not been easy as we are finding they are poor communicators and very slow to respond to our needs. We are addressing our concerns with their sales representative Weeder's Digest and their sales manager along with their owner is planning to have a discussion with the owner of Silver Mist to voice our concerns.

Bayside Subdivision Boat Launch:

As part of the 2022 budget the WWMD has allocated \$20,000 towards the construction of boat ramps to help improve the efficiency of weed harvesting/off-loading as well as the removal of dredging spoils. One of the proposed locations for a boat ramp is in the Bayside Subdivision on a public out lot located just South of 4901 Riverside Road. The APM Committee has begun the process of working with the Town of Waterford, Racine County and the Wisconsin DNR to understand the feasibility of this project and steps needed to begin the process.

In talking with Racine County Zoning and Planning they are researching to find out more information about the property, its title history, covenants and intended use. Racine County Zoning originally told me that since there is no tax key for this property that its very likely if the WWMD is able to obtain a boat launch construction permit from the Wisconsin DNR that they would then issue us a zoning permit to follow the construction guidelines put forth by the DNR.

On 10/22/2021 the APM Committee applied with the Town of Waterford to be placed on the planning committee's agenda for their Monday November 1st planning meeting where we will be allowed to present our request to the Town.

It should be noted that the WWMD during the weed harvesting season for 2021 utilized this undeveloped launch site with our truck and trailer to remove weeds from Buena Lake, Fowlers Bay and Elm Island Bay and to some degree areas around Island View Bay and at no point during use from the months of June, July and August did the WWMD or the Town of Waterford receive any complaints.

The Committee specifically Bill McCormick did contact a riparian who lives near the site along with a resident of the Golfview subdivision to inform them of our intentions prior to submitting to the Town to be placed on the planning commissions agenda and we are now seeing and receiving concerns from some of the residents of Bayside Subdivision in opposition to our plans for a launch development. The riparian who lives next to the proposed lot sent us an email and Bill McCormick immediately sent her a reply addressing her concerns and providing additional information. We have also extended an invitation for those opposed to have a meeting with them to listen and address their concerns. We have also extended invitations through social media and emails for those residents opposed to come and attended our 10/28/2021 WWMD board meeting and provide their comments during our open to the public comment session at the end of our regular meeting. To-date all WWMD committee members have been put in copy each time an opposition email is received and responded to.

On 10/7/2021 Greg Horeth and Bill McCormick met with Craig Helker and Luke Roffler of the Wisconsin DNR to discuss two potential locations for future boat launches to be used by the WWMD for weed removal and dredging spoils off-loading. The two sites proposed are Bayside Subdivision launch and Shore Drive Launch on Island View Court. The DNR representatives advised us on the permitting process and offered up their thoughts and suggestions for submitting permit applications. The application process takes approximately 30-days after we submit for the DNR to formally respond. Depending upon the type of permit we may or may not be subject to a public hearing. Traditionally these types of launch permits take approximately 60-days to receive an approval to begin construction. It should be noted that at this point in time the proposed Shore Dive Launch has been put on hold, due to the high costs of dredging to make this launch site function.

New Harvester Grant Application:

The WWMD is applying for a grant to help off-set the purchase of a new weed harvester for the 2022 season. Our grant application has to be submitted before November 1st 2021 and if awarded we will not be notified until around January 6th 2022. Our riparian's in approving the 2022 budget during our annual meeting in September of 2021 agreed to purchase a new harvester with the condition that we receive the grant for off-setting approximately 30%-40% of the total costs and in addition we must receive an approval from the DNR to harvest in less than 3' of water as we done under special consideration for the 2021 harvesting season.

Bayside Subdivision Boat Launch

Applicant: WWMD

October 22, 2021

Narrative Description of project:

What the project is? The WWMD is looking to construct a boat ramp on a parcel of property located in Racine County in the Town of Waterford, WI on the shores of the Fox River.

Purpose and need for the project: The WWMD conducts weed harvesting in the areas of Buena Lake, Fowlers Bay and Elm Island Bay all of which are part of the Fox River just South of Tichigan Lake. The area of navigable waterway that the WWMD currently maintains is approximately 1200 acres in total. The weed harvesting operation also harvests weeds in front of riparian homes located on the Fox River to maintain a navigation lane from the riparian's piers to the main river channel. In addition, this past 2021 season the weeds along the main river channel were encroaching upon the center of the channel making it extremely unsafe for boats to navigate and pass one another. To alleviate this safety hazard the WWMD upon approval from the Wisconsin DNR conducted additional harvesting to widen the main river channel making it safer for boat traffic. Currently to off load all the harvested weeds the WWMD harvesters have to travel over 2-miles in one direction to arrive at the nearest boat launch. Therefore, there is a direct need to have a boat launch located closer the Buena Lake, Elm Island, Fowlers Bay and main river channel. The proposed "Bayside Subdivision Launch" is a perfect site to allow for more efficient weed off-loading operations.

In addition, the WWMD is planning to apply to the Wisconsin DNR for a dredging permit to allow us to dredge in the areas of Buena Lake, Elm Island Bay and Fowlers Bay and the location of the proposed "Bayside Subdivision Launch" is perfectly located to offer a more efficient dredging spoils off loading site as compared to traveling several miles to the nearest public boat launch that currently exists on the waterway. It should also be noted that the current public launches around the waterway are likely not sufficient for supporting heavy equipment during dredging activities, where as the proposed "Bayside subdivision Launch" could be constructed to more readily handle heavy equipment.

How does the WWMD intend to carry out this project: The WWMD intends to hire a third-party contractor experienced in driveway and shoreline boat ramp construction.

Driveway Construction: In construction of the driveway approach from Riverside Road to the river the contractor will utilize a backhoe to strip off any deleterious material that would normally decompose, they will then dig down to a sound base bottom, #2 100% fractured lime stone will be applied with proper compaction taking place between layers, crushed limestone will then be applied for the top layer of the driveway. Depending upon soil conditions the depth of the driveway could be 12+ inches. A metal culver pipe will be placed under the driveway where it meets the existing road.

Ramp Construction: In the construction of the ramp going into the water, the contractor will dig down to a sound base and then fill in the area with a #2 fractured limestone compacting as necessary. An additional layer of traffic bond will then be applied and compacted followed by concrete being poured. To make way for concrete planks to be installed at the waters edge as well as in the water in front of the ramp will be dredged (a separate small scale dredging permit will be applied for) to a depth of approximately 5' with small rocks and riprap that have fallen into the river in front of the proposed ramp area being removed, so that boat props are not damaged in hitting existing rocks.

Proposed Construction Schedule:

- Apply for DNR Individual permit for boat launch on or before October 22, 2021
- Apply for DNR General permit for small scale dredging on or before October 22, 2021
- Receive DNR permits approved on or before December 24, 2021
- Receive Racine County Zoning permit to follow DNR construction guidelines.
- Begin driveway construction April 4, 2022
- Finish driveway construction April 8, 2022
- April 11, 2022 begins dredging from shore to remove existing rocks and dig out area for applying concrete planks in the water and at the waters edge. Excavate for ramp on shore.
- April 14, 2022 installs concrete planks in water and at water's edge.
- April 15, 2022 pour concrete on ramp.

Note: construction schedule is conditioned upon weather permitting and may be subject to change.

Erosion Control Measures: The WWMD will ensure that its contractors will use the proper erosion control barriers during the construction of the driveway, ramp and small-scale dredging.

Location of Disposal Areas: Dirt and debris from the construction of the driveway will be deposited at a site determined by the professional contractor we utilize in the construction of driveways. Dredging spoils will be deposited on a farm land owned by Tom Greil located at 4901 Big Bend Road, Waterford, WI 53185.

Plan to avoid, minimize and mitigate impacts to waterway: Strict erosion controls measures will be in place during construction and a silt curtain will be utilized during the small-scale dredging process. This site already has riprap and natural vegetation in place.

Area of driveway and ramp: The approach from the road to the driveway will be approximately 35' tapering down to 30' wide X 160' long. Total effected area is estimated to be approximately 4,900 square feet. (35' X 20' = 700' plus 30' X 140' = 4,200')

Waterford Waterway Management District
Information and Education Committee
10.25.2021

Chairperson: Alex Abendschein

Committee Members: Megan Dickenson-Corey, Maureen Vander Sanden, Brandon Begotka, and Patty Schilz

Riparian Owner Communication: There was no direct communication this month with riparian owners. Any future communication from commissioners should be directed to Alex for a winter update. We are planning to send targeted marketing to riparian owners about dredging updates.

Website and Email Hosting: The committee working in conjunction with Margaret Shoptaw began the implementation of using Microsoft 365. We purchased an annual license for 7 members for a total of \$420 annually. Each commission “position” has a unique email that corresponds with their commission responsibilities. See below a list of email addresses. The commission and committees can utilize office 365 to collaborate on projects and have access to the office suite including word, excel, PowerPoint and one drive. We will begin to implement the use of these new email addresses following the November monthly meeting. We will work with each commissioner to setup their email account access.

info@waterfordwwmd.com - Information and Marketing Committee (Alex)

APM@waterfordwwmd.com – Aquatic Plant Management Committee (Bill)

secretary@waterfordwwmd.com – Secretary of the Board (Dan)

ESR@waterfordwwmd.com – Ecosystem Restoration (Grant)

Chairman@waterfordwwmd.com – Chairman of the Board (Greg)

treasurer@waterfordwwmd.com – Treasurer of the Board (Margaret)

specialprojects@waterfordwwmd.com – Special Projects and Legislation (Scott)

*Passwords will be provided to commissioners at the monthly meeting, but upon initial login they will be prompted to change the passwords.

**Note that these emails can be changed, but were established for consistency with the branding across all communications platforms.

WATERFORD WATERWAY MANAGEMENT DISTRICT

LEGISLATIVE COMMITTEE

Monthly Committee Report

October 23, 2021

Chairperson Scott Uhler

- No legislative or regulatory changes affecting WWMD since September meeting.
- No update yet from our County representative Chad Sampson re possible federal funding options under stimulus funding legislation or American Rescue Act.
Have independently reviewed ARPA funding eligibility with Chairman Horeth. The Federal Interim Rule provides that specialized local governmental entities like the WWMD are not directly eligible for funding.
- Special-purpose units of local government will not receive direct funding allocations; however, a state or local government can determine to transfer funds to a special-purpose unit of government. [*Special-purpose districts perform specific functions in the community, such as fire, water, sewer or mosquito abatement districts. It appears the WWMD would be qualified as a special-purpose district, but I am seeking clarification from the State*]
- Eligible recipients are urged to consider green infrastructure investments and projects to improve resilience to the effects of climate change. For example, projects which would address the increased instances of stormwater runoff, water pollution, and flooding. Green infrastructure projects that support stormwater system resiliency could include rain gardens that provide water storage and filtration benefits, and green streets, where vegetation, soil, and engineered systems are combined to direct and filter rainwater from impervious surfaces. Those are projects that fall within WWMD authority and planning.

ARPA GUIDANCE

The Treasury Department has issued a helpful guidance in the form of a Q & A. ***Coronavirus State and Local Fiscal Recovery Funds Frequently Asked Questions***; (JULY 19, 2021) This Q & A provides answers to frequently asked questions regarding the Coronavirus State and Local Fiscal Recovery Funds (CSFRF / CLFRF, or Fiscal Recovery Funds). The Guidance indicates that “special purpose” public bodies are not eligible for funding. I also reviewed the federal interim rule regarding ARPA. In my review of ARPA funding, it does appear that any funding is distributed to the State government for further allocation and distribution to eligible county and local governments. Relevant excerpts from the Q & A:

1.2. Which governments receive funds directly from Treasury?

Treasury will distribute funds directly to each eligible state, territory, metropolitan city, county. Smaller local governments that are classified as non-entitlement units will receive funds through their applicable state government.

1.3. Are special-purpose units of government eligible to receive funds?

Special-purpose units of local government will not receive funding allocations; however, a state, territory or local government may transfer funds to a special-purpose unit of government. Special-purpose districts perform specific functions in the community, such as fire, water, sewer or mosquito abatement districts.

4.2. May recipients use funds to invest in infrastructure other than water, sewer, and broadband projects (e.g. roads, public facilities)?

Under federal law, recipients may use funds for maintenance of infrastructure or pay-go spending for building of new infrastructure as part of the general provision of government services, to the extent of the

estimated reduction in revenue due to the public health emergency. A general infrastructure project typically would not be considered a response to the public health emergency and its negative economic impacts unless the project responds to a specific pandemic-related public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact of the pandemic (e.g., affordable housing in a Qualified Census Tract).

4.6. How do I know if a specific use is eligible?

Fiscal Recovery Funds must be used in one of the four eligible use categories specified in the American Rescue Plan Act and implemented in the Interim Final Rule: a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality; b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers; c) For the provision of government services to the extent of the reduction in revenue due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and d) To make necessary investments in water, sewer, or broadband infrastructure.

[The full Q & A is set forth at: <https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf>]

FEDERAL INTERIM RULE

The relevant provisions of the actual Federal Interim Rule, which further clarify what are allowable investments in water infrastructure, can be found at “*Interim final rule: Coronavirus State and Local Fiscal Recovery Funds*. U.S. DEPARTMENT OF THE TREASURY 31 CFR Part 35”; pages 26802 - 26804 Federal Register / Vol. 86, No. 93 / Monday, May 17, 2021 / Rules and Regulations

[Available at the following link: <https://www.govinfo.gov/content/pkg/FR-2021-05-17/pdf/2021-10283.pdf>]

I have summarized the relevant provisions of the interim rule applicable to water infrastructure projects below:

1. Eligible Water and Sewer Infrastructure Expenditures

- ARPA provides funds to State and local governments to make necessary investments in water and sewer infrastructure.
- Funds to be used for water and sewer infrastructure needs are based on the critical role that clean drinking water and services for the collection and treatment of wastewater and stormwater play in protecting public health.
- Governments have wide latitude to identify investments in water and sewer infrastructure that are of the highest priority for their own communities.
- Eligible expenses would be consistent with the types or categories of projects that would be eligible to receive financial assistance through the Environmental Protection Agency’s (EPA) Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF)(improving water quality and/or addressing water pollution)
- The CWSRF and DWSRF were designed to provide funding for projects that protect public health and safety by ensuring compliance with wastewater and drinking water health standards..
- The State of Wisconsin has some flexibility to direct funding to their particular environmental needs, and each State may also have its own statutes, rules, and regulations that guide project eligibility.
- The funding is to promote the goals of the Safe Drinking Water Act (SDWA), with the principal objective of helping public water systems obtain financing for improvements necessary to protect public health and comply with drinking water regulations.
- The primary use of funds is to assist communities in making water infrastructure capital improvements, including the installation and replacement of failing treatment and distribution systems.

- In administering these programs, States must give priority to projects that ensure compliance with applicable health and environmental safety requirements; address the most serious risks to human health; and assist systems most in need on a per household basis according to State affordability criteria.
- Recipients may use Fiscal Recovery Funds to invest in a broad range of projects that improve drinking water infrastructure, such as building or upgrading facilities and transmission, distribution, and storage systems, including replacement of lead service lines.
- With respect to wastewater infrastructure, recipients may use Fiscal Recovery Funds to construct publicly owned treatment infrastructure, manage and treat stormwater or subsurface drainage water, facilitate water reuse, and secure publicly owned treatment works, among other uses.
- Infrastructure projects related to dams and reservoirs are generally not eligible under the CWSRF and DWSRF categories.
- Treasury encourages recipients to consider green infrastructure investments and projects to improve resilience to the effects of climate change. For example, more frequent and extreme precipitation events combined with construction and development trends have led to increased instances of stormwater runoff, water pollution, and flooding. Green infrastructure projects that support stormwater system resiliency could include rain gardens that provide water storage and filtration benefits, and green streets, where vegetation, soil, and engineered systems are combined to direct and filter rainwater from impervious surfaces.

University of Wisconsin, Division of Extension

I have reached out to the Division of Extension at the University of Wisconsin (and have since followed up, as I have not heard back yet), which lists resources and contacts to support local government utilization of ARPA funding.

Sarah Schlosser and Annie Jones work in their Local Government and Nonprofit Sector Collaboration Organizational and Leadership Development Extension. They work with community organizations and local governments to form collaborative relationships aimed at addressing community issues and have specific resources to identify funding eligibility under ARPA. I have emailed Ms. Schlosser about the WWMD (copy below).

<https://www.lwm-info.org/DocumentCenter/View/4995/Extension-ARPA-Resources-Final>

From: Scott F. Uhler <SFUHLER@KTJLAW.COM>
Sent: Friday, September 17, 2021 5:06 PM
To: Sarah Schlosser <sarah.schlosser@wisc.edu>; Annie Jones <annie.jones@wisc.edu>
Subject: Non-Entitlement Units - ARPA Funding

Ms. Schlosser and Ms. Jones:

I am a Commissioner with the Waterford Waterway Management District. We have been looking for information on possible access to project funding for a lake district in Wisconsin, under the ARPA stimulus funding. There does not seem to be a clear answer as to whether a lake district is an entity that would potentially qualify for funding under the Act. We are checking with you (you were listed in this area as an information source for non-profits and local governments) for any information you may have or may be able to direct us to. Thank you.

 RE: Non-Entitlement Units - ARPA Funding

Scott,

Given the specific nature of your question, I am including a few colleagues on this email that may be better positioned to respond to your question or get you connected with the right person.

Jeremy Solin, Local Government Specialist – he is the lead at the Division of Extension on ARPA and may have some thoughts

Patrick Nehring, Community Development Educator – he works directly with nonprofits and has done a number of trainings for Lake Districts

Eric Olson, Lake Specialists – he works with lakes associations and districts

WATERFORD WATERWAY MANAGEMENT DISTRICT

SPECIAL PROJECTS COMMITTEE

Monthly Committee Report

October 23, 2021

Chairperson Scott Uhler

I have been in contact with former Commissioner Don Baron, who brought me up to date on the applications for 4 special projects that were previously submitted to the DNR for partial funding. I have been in contact with Chad Sampson about the 4 pending special project applications and the process that has been followed to identify and submit a request for funding to the DNR. I have had several conversations with the single vendor that “bid” on the work for the 4 special projects, Jesse Bieniewski, the owner of Stoney Creek Landscaping, located in Burlington. Jesse and Don spent a good amount of time generating photographic evidence of the surface conditions and runoff problems at each of these special project sites, to identify the runoff problem areas and conditions. The projects have been videoed and photographed. The storm water runoff/erosion sites were walked and reviewed for remediation by Chad Sampson, Racine County and Don Baron, former WWMD Commissioner & Special Projects Committee Chairman. The projects and locations are as follows:

- 1- Approximately 150 feet of shoreline erosion on NE end of Lake Tichigan
- 2- Hidden Harbor, ravine cleanup, rock riprap and Sherry Lane field tile repair
- 3- Idlewood Drive, ravine cleanup and rock riprap
- 4- Pete Holden 5225 Riverside Road Shore Restoration and Waterway Construction

Our applications were returned by the DNR, indicating they needed to meet the DNR standards to be considered for partial funding. Those standards are as follows:

PLAN COMPONENTS

A plan shall be developed to guide the restoration process to ensure that restoration requirements and goals for the site are met. There are a few more technical requirements, but these are the basics.

Site Plan

Shoreland habitat restoration site plan for the site. The plan components include:

- Plant density calculations
- Narrative to accompany the restoration site diagram
- Preparation schedule
- Planting dates and schedule
- Care and handling of plant materials
- Watering plan
- Maintenance plan including management of invasive species
- Plant lists appropriate for the site
- Plant and seed calculation worksheet

Site Diagram

- A site diagram of existing conditions. This diagram is used in calculating areas for restoration and developing the site plan.
- A site diagram of the proposed restoration for your property. The diagram identifies the areas to be restored, and the type of site preparation, planting and maintenance needed.

A site diagram must be to scale and shall include:

- Location of existing primary structures
- Boundary of the practice
- Scale (1 inch = 10 feet recommended)
- North arrow
- Location of ordinary high water mark
- Location of viewing/access corridor
- Existing shrubs and trees
- Locations where shrubs and trees are to be planted
- Areas where herbaceous cover will be planted and planting density
- A species list for the site
- Location of erosion control practices to be installed during practice establishment
- Location of practices to address channelized/concentrated flow

Shoreland Habitat Restoration Standards

- Wisconsin Biology Technical Note 1: Shoreland Habitat Restoration. This booklet contains detailed instructions for shoreland habitat restoration.

**Waterford Waterway Management District
Navigation and Hydraulic Management Committee Report
10.19.2021**

The permitting process continues to progress. As mentioned in the last report, the committee is now applying for an 'individual' permit rather than the 'general' permit. What this means is that we are no longer applying for the 50 cubic yards per property owner permit which limits the maximum amount of muck to be removed proportional to the amount of properties to be removed in front of. This means we can remove continuous channels in addition to the access from individual piers. This was the biggest initial concern with the original 2021 concept, as we know barges and equipment requires some depth to get into those areas.

Throughout the permitting process we contracted with Eco-Waterways to assist as their team has pulled hundreds if not thousands of dredging permits over the years. They have calculated exact amounts of muck to be removed based on desired channel widths and depths of muck to be removed in addition to the 50 cubic yards per year in front of each owner's property. The initial calculations were based on 30 foot wide channels at 1.5' of muck to be removed from those channels. Most of our channels are between 2 and 3 feet from the ordinary high water mark (OHWM) to the muck and 5 to 7 feet from the (OHWM) to the hard bottom, therefore this is a 50-75% increase in depth in those channels. Eco-Waterways not only has a great deal of experience in pulling these permits and actually doing the dredging, but they also are performing services that an engineer would charge over \$175 per hour to perform, for a fixed, significantly lower, cost to the WWMD.

An initial width of 30' was chosen for the channels, but the total amount at that width not only put us in the category of a large scale project, it could also raise the cost out of our reach. By decreasing the width to 25' we will remove approximately 80,000 cubic yards in year one. This is 5,000 more than we planned on removing over all three years in the original 2021-2023 plan. We will still apply for removing a total of up to 180,000 cubic yards, with the remaining 100,000 coming at a pace of 25,000 per year if it works within our budget.

The maps and calculations created by Eco-Waterways using their technology is far beyond the maps developed by the committee and was an important step towards starting the project. They were hired in July and are nearing completion of their work. These maps and information will be part of our request for proposal (RFP) to engineering firms who will bid on assisting in developing our RFP for the dredgers. We had a bid back in June for this work from GRAEF, however, three of the Commissioners were uncomfortable with working with GRAEF.

The RFP for engineering will go out in November, then an RFP for dredging will go out in December. By January we will have proposals for dredging with pricing. I expect these numbers to come in between \$2,500,000 and \$4,000,000. We will evaluate based on the actual numbers and then bring our owners together for a vote in January to get the project approved by ownership and then awarded to a contractor.

In addition to these activities, the committee continues to communicate with dredgers and try innovative ways to remove our muck and do it at a lower cost. A local dredger cited potential costs per cubic yard as low as \$6-\$7 for some areas, compared to the \$20-\$30 that the committee has been using as a budgetary figure.

From the finance side we have applied for a Racine County Executive's grant, and are asking for financial assistance from the Village of Waterford and the Town of Waterford, as many residents feel the Town and Village should be contributing. In an official meeting the Village stated they are not opposed to chipping in and will contribute a fair share.

Full steam ahead!
