

Marble Sun Catchers

Beautiful sun catchers made with marbles!

Materials:

Clear Gel Glue (Walmart)

Small plastic plates (Dollar Tree)

Colored flat marbles (Dollar Tree)

Fishing line or thread

Instructions:

Pour a layer of glue to cover the bottom of the plate

Place a layer of marbles in the glue. Make sure to fill the plate and make sure all the marbles are touching.

Let dry - this could take a couple of days depending on the weather.

When the glue is completely dry, peel the sun catcher off the plate. Thread a piece of fishing line or thread through the glue and hang in your window.

Mine has been hanging in the Georgia sun for over a year and the glue has not melted.
