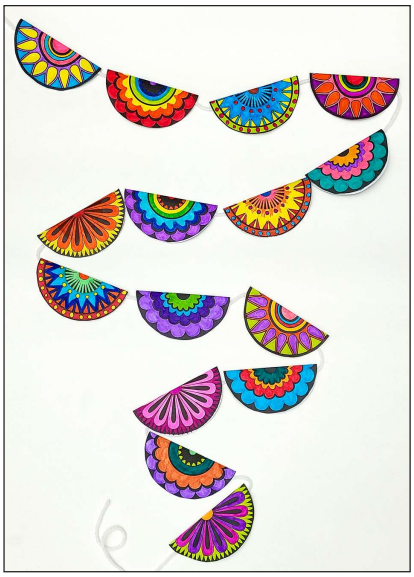
Mini Banner

Color the bunting designs, fold them in half, and attach them to string to make a festive banner for a month packed with holidays.

You will need:



- Bunting designs printed on copy paper (Print 3 to make a 6-foot banner.)
- String or yarn (6 feet)
- Colored markers or pencils
- Glue stick
- Scissors

Show crafters a picture of a completed Mini Banner to create interest in this project.

Directions:

1. Color the bunting designs and then cut them out. Fold the circles in half and glue both sides so they're sandwiching the string, with the colored sides facing out.
2. Tie several banners together for a community project, or display one banner above a window, around a lamp shade, or on a houseplant.
