

Title: Senior Geotechnical Engineer
Location: Berea, Ohio
Salary: \$85,000 - \$110,000 commensurate with experience

Essential Roles and Responsibilities

- Lead safety efforts including preparation and compliance with approved safety plan
- Developing the scope of geotechnical investigation and preparing proposals.
- Supervising the work of engineering staff, technicians, and other laboratory staff, and other support personnel.
- **Teachable.** Some components of this profession are not taught in schools, so a strong desire to be a lifelong learner of new ideas and concepts will be paramount.
- **Responsible.** Self-starter with willingness to interact as a team player and take independent initiative to ensure tasks are completed.
- **Effective Communicator.** Ability to convey complex information to internal and external clients clearly with excellent writing and oral skills.
- **Problem-solver.** Ability to solve minor or complex problems using data, logic, judgement, and problem-solving tools.
- **Professional.** Lead interactions with client and stakeholders to ensure their goals are being considered in execution of the work and communication of project progress.
- **Risk Mitigator.** Develop understanding and be aware of project-related risk. Be familiar with what could go wrong on a project and how to protect the Company. Be familiar with company risk policies.
- **Highly Technical.** Conduct in-depth engineering analysis, investigations and calculations.

What it takes to be successful in this role

- Master's degree in Civil or Geotechnical Engineering
- Professional Engineering License
- Effective written and verbal communication skills
- Valid OH Driver's License

Physical Requirements

- Ability to receive detailed information through oral communication
- Ability to work outdoors occasionally

Why work at Geo-Sci
