SD ECE START

The South Dakota Department of Social Services, the South Dakota Early Childhood Enrichment (ECE) System, and the Helpline Center have partnered to bring you a new online provider portal known as South Dakota ECE START.

Having your program information available and easily accessible to parents seeking child care is a *FREE* benefit to you and is a huge benefit to the children, families, and communities in South Dakota.

At no cost to you, this new Provider Profile Registry (PPR) gives you complete control to maintain and update your program's information:

- Update your information as often as you'd like (days and times open, rates, offerings and more)
- Update your openings (if you are full simply do not enter any openings) and you can opt out of being referred to families if desired
- Add your program's special areas of expertise or experience (letting parents know what makes your child care setting unique)
- Add pictures to showcase your program to families

As an early childhood professional, you play a key role in providing quality care and education for the children and families you serve. With this new system you can communicate your program to families and will soon be able to register for training (professional development) opportunities, and see which ones you have attended.

We are excited to share the new system and show you how much more is available to you as a provider!

Just click the link below to get started:
