My Foster is already: Neutered (Male), Up-to-date on Vaccines, Heart Worm Checked.

Does your foster have any special medical needs or surgery needs? (besides spay/neuter) When we took him in it looked like he was recovering from a skin issue. He has had no issues since we got him in April 2024.

MORE INFO: Emmett is a high-energy, smart, inquisitive, and stubborn boy. He understands when he is being told no, he just doesn't usually care. He is good at sharing food and toys, but does have a habit of eating ANYTHING that is on the floor. Whether this is shoes, treats, toy fluff, or socks (his favorite). He is working on leash training and is generally excited to go on walks. He can be a little speed demon when he is trying to sneak past you to get out the door unleashed, but he is then generally side tracked by his ADHD like personality and starts smelling everything within feet of the house. He loves strangers, but will sound ferocious when they are in his house. He quickly warms up and is excited and over dramatic to meet new people that will finally love his as much as he demands- in his mind.
