Does your foster have any special medical needs or surgery needs? Intervertebral Disc Disease that requires a little help to get moving in the morning, some pain management with medication and a noticeable "wobble" in his gait.

MORE INFO: Buddy is a HAPPY dog. He adjusted into his foster home and with the other pets immediately. He is a "talker" sometimes. He enjoys having other dogs around and loves to be around all people. Because of his medical condition, he should not be in a home with young children and larger dogs that could jump on his back. There should be very limited stairs as he needs an assist. Also, Buddy should not be allowed to jump up or down from furniture and needs full support when picking him up. He does not try to jump up on furniture, he seems to know his limitations. He loves to be in the middle of everything and would be more than happy watching a movie marathon with you. Currently, he still gets around really well and enjoys exploring his fenced in yard. When he is relaxed, he sticks his little tongue out. ADORABLE!
