Crate trained? Yes, but only up to 8 hours.

Housebroken? Will go potty outside but must be encouraged.

Energy Level: Low

Training: Knows sit and crate up.

My Foster is already: Up-to-date on Vaccines, Heart Worm Checked.

Does your foster have any special medical needs? Hammy had surgery for her palate and cherry eye on June 23, 2024. She is feeling much better now.

MORE INFO: Hammy was found as a stray. Animal Control reached out to the rescue to assist in placing her. Her breathing was really strained, and she needs someone familiar with bracy breeds. She is a really sweet girl who is not a fan of being carried around right now. I don't think it is comfortable for her, but she does like to sit on laps. She wants to be where her person is. This little girl was in a bit of rough shape for as young as she is, but she is feeling better now. Hammy took a little while to recover from surgery, but now her breathing is definitely improved. She can finally sleep laying flat, although she doesn't remember that all the time because she's so used to sleeping setting up. She also eats her food a lot better. She used to throw up after her meals, and now that's greatly reduced. It only happens when she eats too fast. Her stamina on walks is also much better.
