#### About Allison Ramsey Architects:

Our firm has worked extensively to raise the standard of new design and development. Its mission of creating and advocating design that is timeless and contextual is evident in our work which can be found around the country and at all price points.

We love to design a custom house with a client. Whether that client is a builder wanting to build a “spec” house or a family wanting to build their dream home, we have a wide range of clients to meet their specific needs. This helps explain our approach to our entire business process, as well. We work in partnership with each client to help them design what they consider the ideal home. We will provide advice and critiques, and make suggestions on how the design can be improved to meet their specific needs, and we understand how to temper the demand for quality design within the given economic realities.

## MEET LEW OLIVER

Lew is an Atlanta-based urbanist, master planner, and designer with more than a decade of experience in advancing New Urbanism and residential design. He envisions, designs, and implements *whole towns*.

Master plans by Oliver are designed with each community's values, local vernacular, and climate in mind. He focuses on the pedestrian experience in each of his site plans, ensuring that physiological and psychological wellness of residents is paramount. Each of his plans considers how to enrich the landscape.

Oliver, Principal of Lew Oliver Inc., is a preferred design consultant of renowned Duany Plater-Zyberk, having undertaken over 40 charrettes internationally. He was instrumental in the design and development of Downtown Woodstock, Southlands BC, Vickery, Rosemary Beach FL, Celebration FL, Serenbe, Lost Rabbit MS, Village at Hendrix AK, and more.

He is celebrated for extraordinary attention paid to form, detail and proportion, making for beautiful, innovative designs.

Oliver has curated a versatile, but exclusive, design collection comprised of highly marketable plans with stylish, timeless exteriors. Most recent displays of his work can be found at Trilith (previously Pinewood Forest) in Fayetteville (GA), Hartness in Greenville (SC), and Voysey in Alpharetta (GA).

Awards for his work include eight 2019 OBIE winners, Atlanta Magazine's Atlanta Groundbreakers of 2017, Coastal Living's Ultimate Designer Beach House at Rosemary Beach, Southern Living's Inspiration House at Cedar Bluff, Congress for the New Urbanism Charter Awards, Best in American Living (BALA) Awards, Greater Atlanta Home Builders Association Awards, and more.

## Craft Design Studio

Kenny Craft

[kenny@craftdesign-studio.com](mailto:kenny@craftdesign-studio.com)

704-408-5501

Craft Design Studio (CDS) is an Architecture firm specializing in Authentic, Traditionally Rooted Architecture, in an Urban Context. Founder and Architect, Kenny Craft, has been a passionate advocate of New Urbanism. CDS is aligned with the movement back to walkable, bikeable, livable cities and communities. CDS has experience with design influence across the spectrum from a larger urban planning, down to nuts and bolts Architecture, as well as at the scale of Interior environments.

Craft Design Studio specializes in Residential Architecture, from high end custom design, to Builder/ Developer homes, from Estates to Rowhouses to Cottage Courts and anything in between. Our particular passion and experience is in New Urban walkable neighborhoods or Historic Urban In-fill locations, but CDS brings a creativity and attention to detail to any scale and scope of design challenge. Craft Design Studio can also provide architectural services for a wide range of commercial architecture, specializing in types common to New Urban Neighborhoods, such as Live Works, Multi-family Buildings, and Mixed Use Buildings. CDS can also provide Town Architect services, developing architectural standards, and upholding them through a rigorous yet customer sensitive review process.

Kenny Craft has served since 2006 as the "Town Architect" for the South Main Neighborhood, in Buena Vista Colorado. South Main is a Mixed-use Traditional Neighborhood Development (TND), planned by Dover Kohl and Partners. Craft Design Studio has designed over thirty houses and buildings in South Main.

## Michael S. Thompson Biography

Originally from New Orleans, Mike was heavily influenced by the architecture of the French Quarter and Creole New Orleans.

Mike attended the School of Architecture at UT Knoxville and graduated in 1993. He started his career in a small one-man office in Memphis, TN designing custom homes. In 1996, he became lead designer at Allen Hoshall designing corporate offices, headquarters, and commercial/retail buildings.

In 1999, he joined Michael Barranco in Jackson, MS as lead designer on a variety of projects, large to small, including master planning, New Urban developments, and residential architecture. During his time here, he teamed up with Duany, Plater-Zyberk on numerous charrettes across the country and in Panama. This is where he reconnected with his love for New Orleans streets and architecture and his new passion for New Urbanism and Traditional Neighborhood design.

Mike began Thompson Placemaking in 2015 and now specializes in authentic southern architecture, Traditional Neighborhood Design, architecture pattern books, small mixed-use and residential design. He currently serves as Town Architect for The Village at Madison in Madison MS, Annafeld in Billings, MT, Adelaide in Starkville, The Lamar in Oxford.

Moser Design Group, Inc. is a residential design and new urbanist planning firm located in Beaufort, South Carolina, with a principle mission for design, the re-introduction of traditional settlement patterns, architecture, and building methodologies within the context of walkable mixed-use communities.

Beginning in 1992 with the pilot infill project of Newpoint in Beaufort, MDG embraced the principles of new urbanism and retooled to concentrate on providing affordable, context driven, traditional architecture for pedestrian-friendly communities. Along with introducing new designs, MDG continues to research and test new building and delivery methods. Specifically, the tectonics that replace the consumptive nature of throwaway buildings with more sustainable and durable building methods that are beautiful and withstand the test of time.
