

# GLASS CLEANER

---

## SUPPLIES

---

1 cup rubbing alcohol

1 cup water

1 tbsp vinegar

## PROCEDURE

---

Carefully mix together your cleaning ingredients in a new, empty spray bottle.

Do not reuse a spray bottle that previously had another kind of cleaner in it.

This eliminates the possibility of a toxic chemical reaction between the new ingredients and the old cleaner.

Can be used on ceramic, chrome, and other hard surfaces.

Do not use vinegar on stone or other materials that can react with or be etched by acid.
