

TOILET BOWL CLEANER

SUPPLIES

2 cups baking soda

vinegar

1 tsp essential oil

PROCEDURE

In a sealable glass container (essential oils can pit metal and some plastics), combine the baking soda and essential oil stirring until all of the oil is well-distributed.

This mixture will last for around 30 cleanings.

When ready to use, add one tablespoon of the baking soda mixture to the toilet bowl.

Pour in 2 cups distilled white vinegar.

The solution will fizz up. Allow it to work until the fizzing stops or at least 15 minutes and then scrub the bowl with a toilet brush and flush.
