

Get advanced communications and AI-powered customer experience with Unite and Contact Center fully embedded in Microsoft Teams.

All In One App

Fully embedded UCaaS and Contact Center solution in Teams

AI-Powered Customer Experience

Smarter interactions through AI insights for agents and supervisors

Simple Pricing

No additional Teams Phone license required

Intermedia seamlessly embeds an integrated Unified Communications and Contact Center solution within Microsoft Teams without requiring a Teams Phone license. Start with Unite (UC) as your foundation, then add AI-powered Contact Center capabilities as needed, all while working in the familiar Teams interface.

TEAMS FOR COLLABORATION. UNITE FOR COMMUNICATIONS:

Use MS Teams for chat, file sharing, and video meetings. Enhance business communication with our enterprise phone system, SMS, and advanced call routing.

INTELLIGENT CONTACT CENTER FOR CUSTOMER EXPERIENCE:

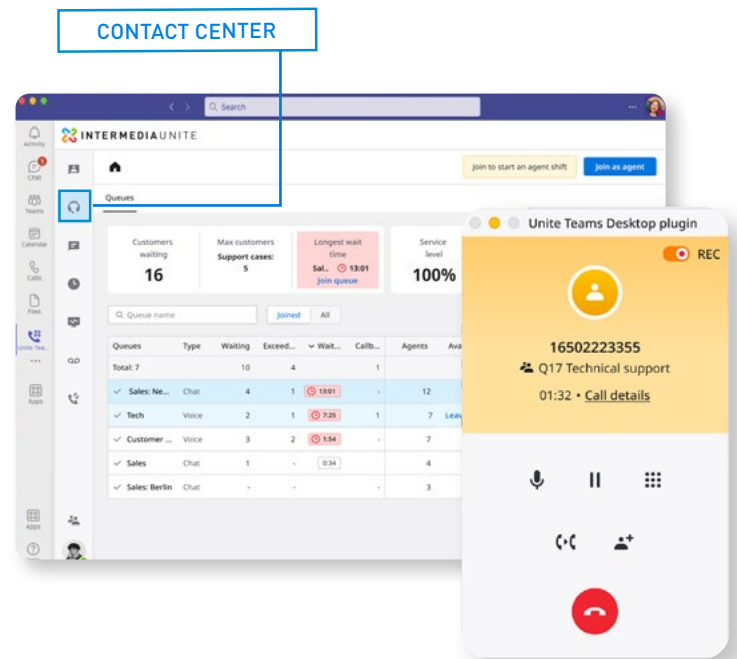

Add Contact Center to Unite for Teams Advanced, to support customer interactions using their preferred communication channel and use AI Call Insights, advanced reporting, and analytics to ensure you're meeting customer expectations.

A SIMPLIFIED SINGLE-APP EXPERIENCE:

Teams users can use Unite for SMS and calls, plus add Contact Center capabilities for advanced customer engagement - all within Teams. No need to switch between multiple applications.

Adding Contact Center to Unite for Teams Advanced transforms your customer engagement capabilities.

Get powerful tools like sentiment analysis, intelligent routing, and omnichannel support (voice, chat, SMS, email). Supervisors gain AI-powered quality management, comprehensive dashboards, and workforce engagement features to optimize every customer interaction. Agents instantly collaborate with experts across your organization in Teams, leading to faster resolution times and improved customer satisfaction, all without leaving the Teams app.
