Departments of Public Service & Public Safety

When a business locates in the City and wishes to occupy an existing building, 3 sets of drawings of the following documentation are needed:

- All information provided for review needs to be prepared by an Architect or Engineer certified and registered by the State of Ohio.
- A full description of the business and the use of the building needs to be provided.
- A site plan needs to be provided.
- A floor plan of each floor level needs to be provided of the business. The floor plan is to identify all new and proposed conditions and construction. The uses of all rooms and spaces are to be specified. All interior finishes and materials are to be specified. Emergency exit signs and lights are to be located. The heating and ventilation system is to be specified.
- All plans need to be legible, drawn to scale and dimensioned. All new construction is to be specified and detailed. All new construction, equipment and finishes are to be installed as required by the building and fire codes. Any construction, equipment or conditions that are hazardous will need to be corrected.
- The plans and documents provided will be reviewed for conformance to the zoning and building codes. A written review will be provided to the applicant if there are deficiencies with the plans. A zoning permit, and building permit when needed, will be issued when the plans are approved. Construction may begin after the permits are issued. Plumbing and electric work require separate permits from County agencies. The construction work and existing conditions will then be inspected and when approved, a Certificate of Occupancy will be issued.

Businesses that are a change in use as defined in the Ohio Building Code are referred to the Building Code to determine applicable requirements. The requirements are not prohibitive; they exist to protect life and property.
