WHY CHOOSE CUSTOM TRAYS?

ADVANTAGES OF CUSTOM TRAYS

One of the advantages of working with Fancort is that we can help you accomplish your goal even if your production is Low Volume-High Mix. Since our process is In-House we keep the tooling cost low, usually 1/10th of the cost of a injection mold tool.

- ▶ Faster turn around.
- ▶ Lead time: Prototyping is 85% faster than injection molding.
- ▶ Large number of material options including ESD materials and antistatic materials.
- ▶ Thermoforming capabilities vary from 0.012" up to .1875" thickness.
- ▶ Plastics used for trays are 100% recyclable. 
- ▶ Used With Automation: Able to be integrate with UR or pick and place devices.
- ▶ Custom made: We can help you get the most of your tray by arranging layout to optimize space.

either for inside material handling or shipping overseas.

COMMON PROBLEM SOLVED

If you are currently experiencing at least one of these problems, then we have a solution for you.

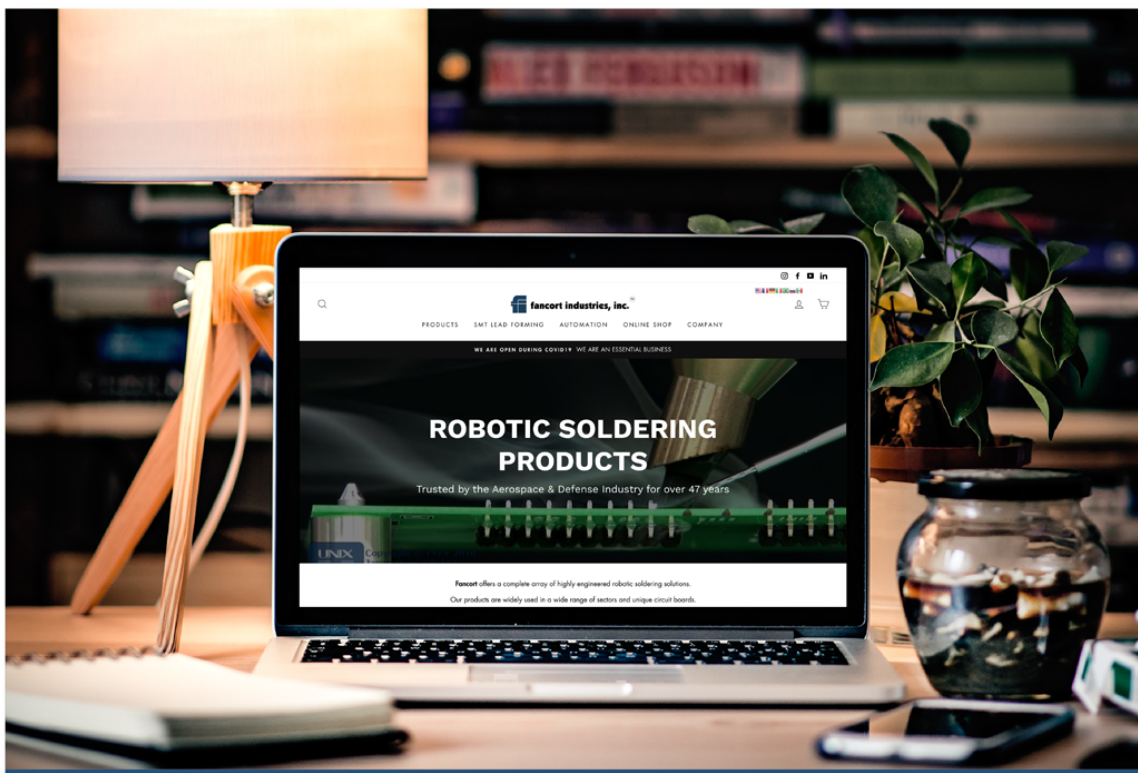

- ▶ Missing components during handling.
- ▶ Board or Finished product damage during handling/storage.
- ▶ Damaged components during handling.
- ▶ Excessive use/waste of static shielding bags.
- ▶ Different board dimensions running for the same project.
- ▶ Cosmetic Issues during shipping process.
- ▶ High packaging cost (Box + Static Shielding Bag + Foam + Bubble wrap, etc).
- ▶ Not having enough space for safe component storage.
