

I-15 Flamingo to Sahara Feasibility Study

Online: I-15FlamingoSahara.com

Virtual Public Meeting: **Open May 25 - June 23, 2021**

The Nevada Department of Transportation (NDOT) has been making investments in improvements to I-15 over the past three decades. The section of I-15 between Flamingo and Sahara is the last section to be upgraded adjacent to the Las Vegas Strip. This project is a Planning and Environmental Linkages study being used to identify and screen alternatives within a study area to advance the most feasible alternative(s) into future a future National Environmental Policy Act study.

ABOUT THE PROJECT

This project is investigating needed improvements for this important section of I-15, passing through the Resort Corridor, to align capacity needs with recently completed projects such as Project NEON and the I-15 South Design Build. The existing I-15 corridor from Flamingo Road to Sahara Avenue can only accommodate five through lanes in each direction and fails to meet the future traffic demands which will further delay travel through this segment.

NDOT is working to address these deficiencies by evaluating possible improvements and modifications to I-15 in this 4.5-mile segment. This evaluation has consisted of a Feasibility Study which has identified design alternatives that will optimize the operational efficiency and traffic capacity of I-15, as well as its adjacent interchanges with Sahara Avenue, Spring Mountain Road and Flamingo Road.

WHY IS THE PROJECT NEEDED?

The purpose of the proposed project is to:

- 01 Resolve existing roadway deficiencies
- 02 Provide transportation improvements to serve existing and future growth areas
- 03 Accommodate regional and local plans

GET INVOLVED

Visit I-15FlamingoSahara.com to learn more about the project and to participate in our Virtual Public Meeting! Submit your questions and comments online, or via email to the NDOT Project Manager: JPullen@dot.nv.gov

WHAT IS A FEASIBILITY STUDY?

The I-15 Flamingo to Sahara Feasibility Study is being conducted to help identify proposed improvements and solutions in the study area with input from the public.

The project team has evaluated potential improvements and analyzed their effectiveness against opportunities and constraints in the current corridor, available and needed resources, and costs required. Ultimately, these potential alternatives will be further analyzed in the National Environmental Policy Act (NEPA) process.

What are the proposed improvements?

Four potential alternatives have been identified. To learn more, please visit our project website: I-15FlamingoSahara.com.

When will an alternative be selected?

After the Feasibility Study is completed, the recommended alternative(s) will be further evaluated in the NEPA (environmental) process. An alternative will be selected at the completion of the NEPA process.

When will construction begin?

A timeframe for construction has not been determined at this point in the study process.

Who are the project stakeholders?

NDOT is delivering this project in partnership and collaboration with Federal Highway Administration, RTC of Southern Nevada, Clark County, and the City of Las Vegas.

What is the timeline of the Study?

The study is expected to be complete by the end of 2021.

How can I provide input?

NDOT is holding a virtual public meeting from May 25 - June 23, 2021. During this time, please visit www.I-15FlamingoSahara.com anytime at your convenience to view project materials and contact our team with your comments and questions.
