## Have you heard the term Parallel Economy?

What is meant by the term "Parallel Economy" and why should you care?

A traditional definition of the term Parallel Economy is

"a market for shares, currencies, etc., which works at the same time as the official market." In this general context, parallel economies are often thought of as "black markets."

In the context of current politics however, "Parallel Economy" refers to businesses, entities, and governments that refuse to violate the US Constitution or "bend the knee" to policy demands that center around "Woke Culture Activism."

# FACTS ABOUT MASKS

## OXYGEN DEPRIVATION & CO<sup>2</sup> POISONING

Children require more oxygen than adults as their lungs are smaller and weaker. Reducing oxygen intake can cause irreversible damage to the brain, heart, & lungs. After just one minute, CO<sup>2</sup> levels are 25 times higher than the accepted tolerance levels. Symptoms may include dizziness, anxiety, tiredness and reduced performance.

## BACTERIAL INFECTION

In the warm and moist environment of a mask, bacteria, virus & spores thrive exceptionally well. Masks can cause skin issues, make the wearer very sick and spread disease.

## PSYCHOLOGICAL DAMAGE

We are social beings. Facial expressions are a crucial part of our learning and understanding, especially during our childhood. Children can suffer psychological damage when unable to communicate adequately with others.

Being unable to recognize emotions adds to the psychological suffering.

Masks fuel anxiety and stress.
