Joan Hartman flash back

our 3rd District County Supervisor completely lied about Ivermectin (prescribed and approved for human consumption literally over 1 billion times around the world).

Instead she coerced her constituents to take an experimental drug, that still has not been "licensed" by the FDA

"If someone had told you in the summer of 2019 – a time when California enjoyed an approximate \$21 billion dollar budget surplus, the overall US economy was strong, our borders were being secured, big and small business was booming, lower and middle class wages were on the rise, inflation was

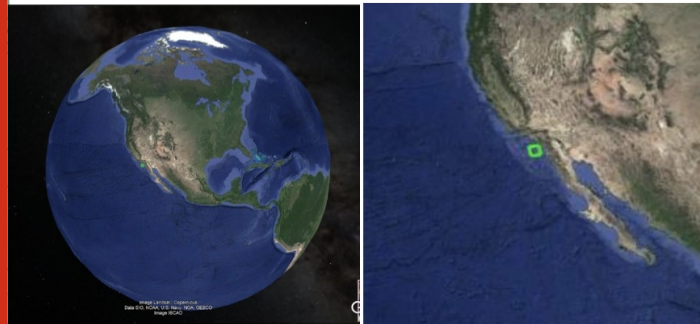

essentially non-existent and a Republican administration had stymied China, delivered the Abraham Accord, unwound participation in Afghanistan with no casualties and did not engage in any new wars – that less than two years later your world would be almost unrecognizable... "

The UN says that the Earth's population will soon reach 8 billion people, and the Malthusian population control lefties are going to go crazy.

Here's what 8 billion of us standing 3 ft. apart in a grid (3 feet left to right, and 3 feet front to back) would look like. A square only 50.8 miles on a side.
