

Kennedy-Warren

Current Name: The Kennedy-Warren

Original Name: The Kennedy-Warren

Address: 3133 Connecticut Avenue, NW
Washington, DC 20008
(Woodley Park Neighborhood)

Architect(s): 1930-31, Joseph Younger
1935 Addition, Alexander H. Sonnemann
2003-04 Addition, Hartman-Cox

Year of Construction: 1930-31; 1935; 2003-04

Current Use: Residential

Original Use: Residential

Many Washingtonians know that the large complex that dominated this part of Connecticut Avenue was about two-thirds of what was planned, interrupted when the Depression halted new construction. Now, however, the building has been completed to the original design with very careful matching of materials on the exterior. The building's entrance, now nicely centered on the completed courtyard, is notable, one of the best in Washington, with a distinctive tower and a beautiful Art Deco aluminum canopy.

All of the Art Deco decorative details are totally integrated into the building's design, both inside and out, making it a symphony of Aztec and other exotic motifs rendered in aluminum, limestone, and brick and continued indoors to the interior finishes.

It is also believed that the Kennedy-Warren has the earliest natural cooling system in the country - drawing air from deep in Rock Creek Park behind the building and circulating it to every apartment.
