

# Attracting Butterflies

## Reminder:

You also must plant what caterpillars will eat. Red is their favorite color. Plant in large groups, with similar colors in full sun. They should be planted out of the way of the west wind and be protected by the west wind. Incorporate rocks and brick, flat stones or paths. Developed mud puddles in a sunny spot of the garden. Keep a shallow dish of sugar water in the garden.

Yarrow  
Butterfly Weed  
Butterfly Bush  
Blue Mist Shrub  
Clethra  
Tickweed  
Cosmos  
Dame's Rocket  
Dianthus  
Dogwood shrubs
