

HELPFUL APPS

SAFETEAM WEB APP

ZALEMO has developed safety management software and created a state-of-the-art application to help employers in any industry measure their safety performance, training needs, and even project manhours.

CONFINED SPACE 101

Confined spaces can be serious workplace hazards. OSHA has developed regulations for both the General Industry and Construction Industry to better protect workers in hazardous confined spaces. This app explains the regulations and assists in evaluating confined spaces and permit required confined spaces.

SAFETY CULTURE

Confined space risk assessment is a systematic process that ensures proper safety and evacuation procedures are followed and necessary permits are acquired when working in confined spaces. When conducting a confined space risk assessment, templates and safety checklists are used to check and record atmosphere testing, adequate ventilation, PPE usage, staff signatures, and permit documentation.
