The Importance of Safety

October 2021

Housekeeping

Muster Point

Why is Safety Important?

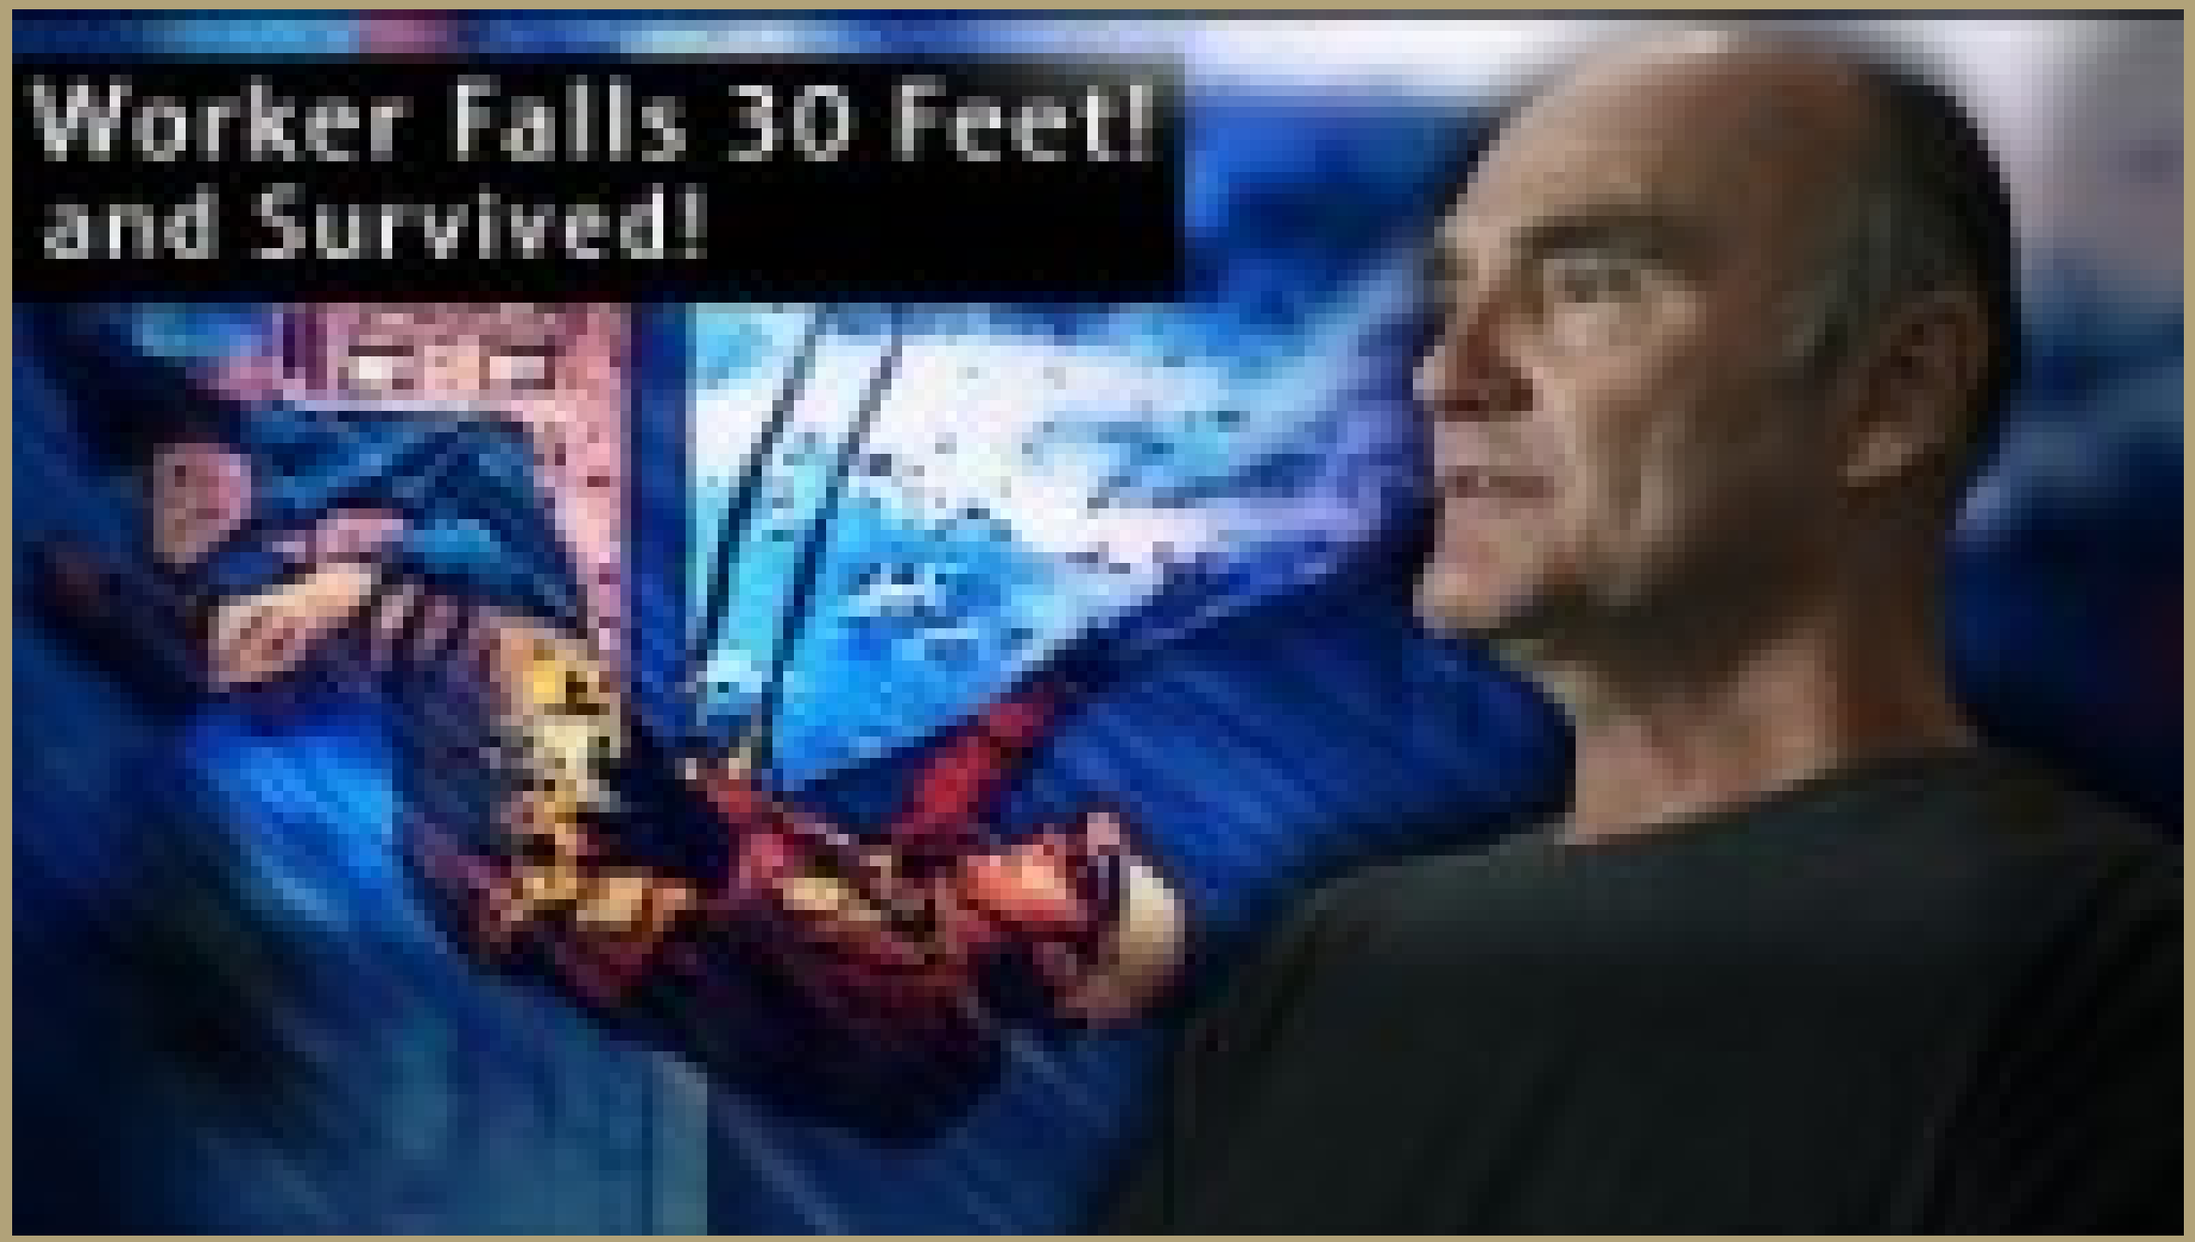
What are the benefits of working in a safe environment?

- Working safely protects workers from injury and illness
- Lowers injury/illness costs
- Reduces absenteeism and turnover
- Increases productivity and quality of products
- Raises employee morale

Sharing Stories

You never know what another person will take away from an *experience* you share.

The Cost of Accidents



Why am I here?

You are the KEY to SAFETY!

HSE Skills and Tools

- HSE Skills

Hazard Identifications (HAZID)

Conduct Effective Toolbox Talks

- HSE Tools

HAZID Training

Toolbox Talk Form

HSE Handbook

HSE Meetings

Hazard Identification

- Goals
  - Establish shared understanding of the most common Key Risk Conditions and what can go wrong
  - Provide mitigation measures
  - Define who is responsible

Key Risk Conditions: Always and Never

- Always:
  - Perform a HSE Toolbox Talk and work with a permit or safe system of work
  - Use the correct tools for the job
  - Use the correct Personal Protective Equipment
  - Intervene when you see an unsafe act
  - Adhere to site speed limits and driving requirements

- Never:
  - Remove safety isolation / equipment barriers
  - Walk under a suspended load
  - Be exposed to a fall or work at height without protection
  - Expose yourself or others to the risk of dropped objects
  - Perform tasks for which you are not trained

Responsibility

Compliance

Controls

Planning

Monitoring

Effective Toolbox Talks

EXPLAIN what needs to be done

ASK and LISTEN for understanding

TELL the team what you are going to do

What a Toolbox Talk is **NOT**

Only about HSE

Only about the task

Replacing a risk assessment or JSA

Just paperwork

What a Toolbox Talk **IS**

FLOW CONTROL GROUP

- A communication exercise
- To share experience on HSE
- To check roles and responsibilities
- To ensure correct procedures and competencies
- To check worksite and operating conditions
- To agree on STOP the Job triggers
