RECHARGE YOUR BATTERY

If you feel powerless, maybe you need your spiritual battery recharged. Jude tells us that we build ourselves up on our most holy faith by praying in the Holy Ghost. This is not a one-time experience. It is an everyday filling for each Christian. Sorry to say, but all our batteries leak, and need a daily charge. If you are low on the power come to the filling station daily. You might ask, "What is the filling station?" The answer is simple. It is the word of God. Come daily and get filled up! It will change your life!

Without that power in our lives, we live a defeated life even as Christians. We must take the time to get quiet, rest, and refuel. Even a few minutes daily can be effective. Start with a chapter from the Old Testament and a chapter from the New Testament. I guarantee you will get something each time you read the bible.

Do not put it off. Do not wait until you have a "spiritual dead battery" to get charged. Like a car, you cannot let it sit for an extended period of time or the battery will get weak and eventually die. You need to have an active relationship with God daily to keep your spiritual battery charged!

You may have been in a revival once. You may have seen healings and restoration and salvations. That was yesterday. Today it is a fresh new opportunity to take that word of God to a lost and dying world that is hungry for a touch from God.

You have your own Jerusalem right where you live. Your own Samaria is the county and state that you live in, but do not stop there. Keep burning with the light and power you receive from being alone with God wherever you may go!

Keep your battery charged, and shine for Jesus. You will never regret it.
