### ANGELIC INTERVENTION

On Friday as we were driving our granddaughter to work, a warning bell sounded, and we saw that our car suddenly was overheating. The lighted panel said, "engine overheated." The thermostat registered to the H for hottest. We had two miles to drive to get out of traffic and get her to work safely. We started to pray and commanded angels to come to our aid. We continued driving even though the light and warning bell remained on. We made it there safely.

When the warning bell sounded, we started to pray. I prayed that God's angels would protect us, and I know without a doubt that God sent his angels to do just that.

We had the car towed to the dealership where we had bought it only six weeks earlier. After speaking with them today we learned that there had been an oil leak in a seal. They said there had to be oil in our driveway, because there was no oil in this car at all. Yet, our driveway shows absolutely no oil residue. I even screenshot the driveway. The mechanic could not believe there was no oil.

We learned today that the seal had leaked oil that caused the serpentine belt to come loose and then become shredded. It then wrapped around the tensioner that holds the belt, causing it also to break. When this happens a car's power steering goes out, the air conditioning goes out, the water pump goes out and the engine stops. None of these things happened to us.

Any of the things could have happened when that belt broke. There was no sound in the car indicating that something had happened. I had total control of the steering and the engine never shut off. This just does not happen in cases of serpentine belts being broken. The Lord showed me that angels protected us. We were on an extremely busy highway and if the steering had gone out, we could have had an accident. God protected us!

The Lord took me to Psalm 34:7 which says, ***"The angel of the LORD encampeth round about them that fear him, and delivereth them."*** This is exactly what happened to us.

One more miracle that happened with this car. When we bought this car, it was eight years old but had very low mileage. I asked for a warranty and was given a one-year warranty with a \$200 deductible for anything major. This is unheard of on an eight-year-old car, but God favored us with it.

The estimate for the repairs was close to \$3,000 which included fixing the seal and replacing the belt and the part that holds the belt that also broke. God knew this would happen before it ever happened and protected us with the warranty.

I want to jump up and shout and praise the Lord for his goodness. Once again, I give him all the glory for what he has done in my life!
