STALE BREAD

I do not care to eat stale bread. I had some bread sitting on the counter and it became moldy and hard. It wasn't something that was desirable to eat. About the only thing it was good for was feeding it to the birds.

Fresh bread always tastes so good. I like to bake banana bread and it is always the best when it comes straight from the oven. You could say that it melts in your mouth. It satisfies that taste bud that was drooling for it.

We like fresh bread in the natural but often settle for stale bread spiritually. How do you identify it? It is something old that we still chew on. It may have been tasty years ago, but it just isn't fresh anymore. This doesn't mean that the concept of bread isn't good, it just means that it isn't tasty served the way it used to be served.

As we read the word of God, which is the bread of life, it is always fresh. It always amazes me how we get something fresh from a centuries old story. Often it is a story that we have read hundreds of times. With God, the story is fresh. There is always something new to "eat" from it. What makes it stale is when we don't go back and reread the scriptures and depend upon yesterday's bread.

I challenge you to eat the bread that is fresh daily.
