CONSIDER THE ANT

Proverbs 6:6-9 speaks about the ant. Verse 6 tells us to ***“consider her ways, and be wise.”*** These verses compare a person that does not work with the busy ant that is constantly working to take care of its queen. An ant works day and night bringing food to the ant nest. Ants like sweet things and greasy things. Both of those aren't the best for us, but many times we are like that ant.

We have had periods of time when ants try to come into our home. They can be pests because they are looking for food for their queen. The only way to get rid of them is to poison them. We have used a product called Terro®. It is a liquid bait that attracts ants. A few drops on a counter brings the ants by hoards. They like the taste and take it back to their nest. Little do those ants know that what they have tasted, and carry will kill them and the other ants too.

There is another side to this story. I see so many people attracted to Artificial Intelligence, known as AI. Many see this like Terro® as a sweet way of life. They are being drawn to it just like ants to the poison. They get hooked on it, not knowing that it will bring them captive to non humans doing their thinking. It is poison. Stay away from it.

Like Terro® AI may taste sweet at first, but the poison is hidden in the sweetness. I truly believe it is ushering in the beast system. Of course this is my opinion, but you can never say you were not warned.

Yes, we must be diligent like the ant being about the Father's business but not deceived into thinking that everything is good for us.
