## THE SEVEN PRAYER MOUNTAINS – LESSON 5 EDUCATION

A highly significant influence on society is the education we receive from elementary school through college. The type of teaching that my generation of baby boomers received no longer exists. It was replaced in the 1970's with a liberal, leftist, Marxist agenda.

Civics (our foundation governance) no longer is taught in most schools. Mathematics has been altered in a way puzzling to us; students now demonstrate a lack of basic math skills. Science theories and the evolution theory are taught as absolute fact instead of theory. History has been revised to a liberal agenda instead of true history. All of this is causing great change in all seven aspects (influences, mountains) of our society. This "re-education" has been responsible for all that we are seeing today.

It takes years for a "new idea" to come into full fruition. The humanist philosophy introduced in 1933 (Humanist Manifesto) overtook education in the 1970's. Prayer and the Bible were eliminated from schools. A mindset of "I'm okay, You're Okay" put focus on acceptance and tolerance of individual's differences (a gateway to homosexuality). The Bible was taught as just a storybook. Religion was taught to be a crutch for weak-minded people. All this was a deliberate design to change America (and the world).

There is a truism that says, "If you want to change the future, just change the past as you wish, and that will change the future accordingly." That is why all aspects of our historical past have been re-written by the education establishment. It is "revisionist history" which purposely obscures true history to get their desired result. The "common core" curriculum mandated by previous presidential administrations has promoted this revisionist agenda. Testing of students was based upon it, and government funding of schools was tied to it. Florida is fortunate to have Governor Ron DeSantis who has ditched common core to return to the older and better system, but most other states are still into it heavily.

For our "mountain moving" prayer points, we should pray that:

1. God is allowed back into our schools
2. Christians will choose an education career
3. Christian teachers will stand boldly outspoken in their faith
4. Believers will become principals, administrators, and school board members

5. Department of Education executive positions at state and national levels would be filled by fundamental Christians
6. The 95% of liberal of liberal university professors will be replaced by conservative professors
7. Conservative and Christian parents will protect their children's values by home schooling
8. The government will become very supportive of home schools

Education is the key to re-shaping the future, but it must be grounded in the Judaic-Christian ethic upon which our nation was founded.
