RESURRECTION DAY

There are many religions that have been built on individuals. Islam is built on Muhammed. Hindus have thousands of different gods. There are denominations built on individuals like Ellen White that have perpetrated a false gospel of Sabbath and works. There are others that supposedly met an angel that gave them "another gospel" like Joseph Smith of the Mormons. Then there are those that claim to be of the 144,000 in the book of Revelation, the Jehovah Witnesses. There are so many false religions and false leaders, take your pick if you want to follow them and be led into deception.

There are those that say that there is more than one way to heaven, and that Jesus is not the only way. They have believed a lie. Jesus himself said in John 14:6 ***"...I am the way, the truth, and the life: no man cometh unto the Father but by me."*** That is a very narrow way. It cancels out those that say there is another way.

Yet, what is the difference between these so called "religious leaders"? Everyone of the false leaders have died, and never rose from the dead. You can worship a dead "god" if you want, but I prefer to give my allegiance to the one that was "resurrected" from the dead. Why is this important? The reason is simple. Jesus never sinned so Satan had no hold on him. He couldn't keep him in the belly of the earth - hell. The resurrection is our guarantee of salvation and eternal life with God. Without the resurrection Jesus would be just like the rest of the "dead" leaders – gone and forgotten. Just an idol to worship. No life.

Because of the resurrection he was able to place his sinless blood on the altar in heaven which was payment for all mankind's sin. Sinless blood on a sinless altar. That sealed us. So, when we celebrate "Resurrection Day" (not Easter, that is the world's holiday) we remember that it is our guarantee of eternal life.

Why put your trust in someone that is dead, when you can put it in the one that rose from the dead and paid for your sin? The answer is simple. Don't.
