

SUCCESS!!

Patient Name: Liam Theisen
As told by his mother.

Liam had severe eczema over his entire body. He was uncomfortable all the time and to top it off he was teased at school, too. He had bloody sheets every morning because of the itching he did at night. He had “pins and needles” feeling in his hand and feet.

We met Dr. Crumbaugh at two events at Health on Main. At one of the events she had some scales to see how even Liam stood side to side. We were shocked to see he was 11 pounds heavier on one side! She spoke to us about how chiropractic can sometimes help kids with eczema. She also shared her own story about her eczema and how chiropractic and acupuncture helped her heal.

Liam is now more comfortable both during the day and at night. He doesn't have any more pins and needles feeling. He has very little, if any, blood on his sheets in the morning. His skin is not flaky dry anymore. He also seems to be able to concentrate in class better because he's not itching all the time.

We hope to continue with visits to keep Liam's spine in correct alignment AND to keep his eczema “away”!

I hereby give my permission to publish my success story in whole or to summarize its contents in any of the publications of Live Well Chiropractic.
