**SUMBA UNVEILS CUTTING-EDGE PARK OPERATIONS & RISK MANAGEMENT PLATFORM**

*New Service Management System Uses Latest Technology for Entertainment Center Maintenance and Inspections*

---

**Bellefontaine, Ohio** – SUMBA is excited to announce the launch of its next-generation, fully integrated workflow engine to help family entertainment centers, trampoline parks, and those in the out-of-home leisure and entertainment market achieve optimal safety compliance with a real-time solution.

With an extensive background in building and assembling amusement attractions, as well as providing maintenance and inspection services, SUMBA's founders had a goal to create an inspection and maintenance solution that would save time and increase safety in the family entertainment industry while providing additional levels of protection from litigation through improved operations and standards. The SUMBA platform is customizable to your operations and includes a comprehensive, digital inspection checklist, an automated solution for ordering failed or replacement parts, verifiable documentation of inspections, and the ability to achieve hassle-free compliance, which could also result in lower insurance premiums.

According to Mike Lump, COO, "Entertainment centers continue to raise the bar with their expanded attractions mix, which creates a need to inspect equipment daily, weekly, monthly and annually. The SUMBA platform has been ranked 'Best in Class' by Haas & Wilkerson Insurance for its ability to deliver a simple and effective solution to produce verifiable inspections with the real-time ability to confirm who is inspecting, what is being inspected, and to even upload photos to records as the work is completed."

The IAAPA Expo, being held November 19-22, 2019, is the world's largest tradeshow for the amusements and attractions industry and provides SUMBA with an opportunity to demonstrate their innovative tablet-based software platform. Attendees can visit them at booth #4180 to learn more.

Jason Proffitt, CEO for SUMBA says, "We are excited to be launching a product that will eliminate the need for cumbersome paper-based inspection systems, save owners and operators hours of time, decrease the possibility of human error, and increase the overall safety of the facility."

The SUMBA Team believes that their platform transcends the operations of the entertainment facility by creating a system of engagement that connects owners/operators with the manufacturers, insurers, franchisors and anyone involved in the day-to-day operations and safety of the park. For

## **ABOUT**

SUMBA, LLC, is creating the next generation maintenance and risk management solution for the out-of-home entertainment industry. They are a leading provider in the design, maintenance, and inspection of entertainment attractions with over a decade of experience that includes the design of more than 55 family entertainment centers and providing maintenance and inspection services to over 100 facilities worldwide.

SUMBA's integrated platform offers a multi-level operations management solution that works to mitigate identifiable risks to minimize, monitor and control the probability of equipment failure. It also provides the tools to keep your park running smoothly with automated parts reordering, staff training, reduced paperwork, verifiable documentation, the ability to track incident reports and to create service, inspection and training schedules.
