

NutriLean™ is a synergistic supply of Forskolin and Acetyl L-Carnitine designed to mobilize fat from the adipose and increase thermogenic response.

Proven Results with Forslean and Acetyl L-Carnitine

- ✓ **Pharmaceutical Grade and Therapeutically Dosed**
- ✓ **Forslean® Patented Form of Forskolin**
- ✓ **Stimulates Release of Fatty Acids from Adipose Tissues**
- ✓ **Assists in the Transport of Fats into the Mitochondria and the Production of Cellular Energy (ATP)**

Each capsule contains:

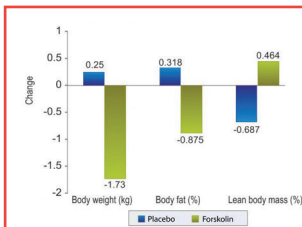

Acetyl L-Carnitine	500 mg.
Forskolin	100 mg.
Dexpanthenol (B-5)	10 mg.

(in a base of Coenzyme Q10, Pycnogenols and Marine Lipids)

Pharmaceutical Grade and Therapeutically Dosed

Mobilize Fat Out of Adipose Tissue and into the Mitochondria for Cellular Energy (ATP)

Forskolin activates fat burning enzymes called Hormone Sensitive Lipase, which frees fatty acids from stored fat so they can be used to create ATP. For this to be accomplished, the fatty acids must be transported into the mitochondria. Acetyl L-Carnitine facilitates the transport of fatty acids through the cell wall and into the mitochondria, the cells energy furnace.

A 3-month, randomized, double-blind study results from 60 overweight volunteers found that consumption of Forskolin produced a significant reduction in body weight and body fat when compared to placebo group. No subjective or objective side effects in the active group were observed.

Biological Effects of NutriLean™

- Activates Fat Burning Enzymes
- Increases Cyclic AMP
- Preserves Lean Body Mass
- Improve Metabolic Function
