

LIPO BC is a significant blend of “fat loving” lipotropics and B-Complex, which are essential in any weight loss program.

Lipotropics help to increase fat metabolism, protect against the abnormal accumulation of fat in the liver, and remove and transport fat out of the body.

LIPO BC is specially formulated to provide nutrients that support the body’s own synthesis of lipotropic factors and key elements for proper metabolism of fats and carbohydrates.

Advanced Lipotropic Formulation
