USER CREDENTIAL SET-UP

Getting Started...

Every school license includes up to 10 user profiles, which can be set-up for **specific** teachers, **general** classrooms or any **combination** of both. To expedite the process of activating your account, simply send us your list of email addresses for each of the user profiles that you need created for your account. We'll get your account set-up and running in no time.

What's the difference with these types of users?

It's all a matter of personal preference and what is convenient for you. Some schools prefer to give access to specifically named users, for example: Mrs Martinez. While others prefer to set-up their users for general use, for example: Grade 3. In either case, valid email addresses are required for each user to activate their profiles. This is because instructions will be emailed to each user with the final steps needed to create a password and activate their credentials.

Please be sure to include this completed form with your Purchase Order to avoid any unnecessary delays in setting up your account. If you don't need all ten user accounts right away, you can send us what you need and add the additional users later. If you are purchasing multiple licenses for your school or district, you may submit a master list spreadsheet electronically with your purchase order.
