

Servant Leadership Workshop

Leadership is the capacity to translate vision into reality

Servant leadership can seem like a contradicting term, but it is becoming a very popular tool in many businesses and organizations. Servant leadership is a philosophy that involves focusing on others (i.e. your team and/or employees), and focusing on their success, and in turn building better professional relationships that can benefit both leaders and team members. Servant leadership helps leaders become better at leading while boosting their team's confidence and motivation, and furthering their success at the same time.

With our "Servant Leadership" workshop, your participants will discover the specifics of how servant leadership works and how it can benefit both leaders and team members!

Workshop Objectives:

- Define servant leadership
- Know the characteristics of servant leadership
- Recognize the barriers of servant leadership
- Learn to be a mentor and a motivator
- Practice self-reflection
