**Featuring Election Integrity Expert and Activist:**

**Dr. Douglas G. Frank, Ph.D.**

**Dr. Frank** shows how our elections are manipulated and how citizens and elected officials can defend and improve election integrity.

**Dr. Frank** is a world-renowned physicist with 60 peer-reviewed scientific publications, including cover and feature articles in the world's leading scientific journals. His Ph.D. is in surface-electroanalytical chemistry, which combines chemistry and physics techniques for the manipulation and analysis of molecules on surfaces. In 1996, **Dr. Frank** left the academic world to apply his scientific expertise and skills in the real world, helping to invent and manufacture electron microscopes, laser scanners, and precision manufacturing and control devices.

**Dr. Frank** also established a special school for extraordinarily gifted children near Cincinnati, Ohio, where he served as the Math & Science Department chair for 25 years.

Following the 2020 general election, **Dr. Frank** turned his scientific and data analysis skills to election integrity. By analyzing election and voter registration data, **Dr. Frank** is able to demonstrate that the 2020 general election was not honest and fair and that major problems still remain.

Since December 2020, **Dr. Frank** has worked ceaselessly for election integrity and reform with grassroots

teams in over 40 states. He has met with Secretaries of State, State Attorneys General, dozens of legislators, and hundreds of local election officials to improve election integrity.

**Dr. Frank** was featured in Mike Lindell's documentaries "*Scientific Proof*" and "*Absolute Interference*." **Dr. Frank's** data-driven presentations are informative, engaging, and persuasive, and they unequivocally demonstrate that America has serious election integrity problems to fix.

But there is HOPE...

**Dr. Frank** comes with clear action steps so we can create a ground game to effect positive change.
