

March 5, 2024 – Day 2,111,592 of the Crisis of Identity

Title: Actors on a Stage

Do we know what is real anymore? Who is telling the truth? The media circus continues to bring us the facts, right? With so much media today how do we understand how to sift through all the noise? I believe we have come to a place in society where we have become so fragmented and divided by the knowledge of good and evil, we cannot see the truth. Have we become willing participants of the play? How do you remove the static so you can hear the truth? I would venture to guess that the majority of Christians in America or even around the world do not know what's at the foundation of why they believe as they do. We are fed a steady diet of the devil is coming to get you, and a political rhetoric meant to engage people into determining the governing of a nation. Christianity in its different forms in the world hold different ologies!! This idea of understanding the gods is very old. The how is the part that gets cloudy and usually very vague. Faith has become the buzz or catch word for this thought process, you just have to believe! Believe WHAT!!
