About the Otter Lecture

River Otters of South Florida: Otter Research and Otter Education Programming

The otter lecture is about the natural history of the North American river otter (*Lontra canadensis*) in Florida, particularly south Florida and also includes information on all 13 otter species in the world and the relatives of the otter. The lecture is scheduled for 50 minutes plus a 10 minute break. There will be 15 minutes at the end of the lecture to ask questions.

Otter Arrival to the New World
Geographical Range
