River Otter Sightings in South Florida

What is Considered a River Otter Sighting in South Florida

For a river otter sighting in south Florida to be reported the river otter sighting had to occur in south Florida. South Florida is considered as the area of Florida beginning at the most northerly point on Lake Okeechobee and extending west to the Gulf of Mexico and east to the Atlantic Ocean and south through the Florida Keys. A river otter sighting in south Florida includes both living and dead otters observed anywhere in south Florida. For dead otter sightings also include otters seen on, along, or near a roadway. Should you observe any dead otter on, along or near a roadway please complete a Florida River Otter Roadway Mortality Sighting Report
