Map of River Otter Sightings in South Florida

UNDER CONSTRUCTION

The software to create an interactive digital map of River Otter Sightings in South Florida has not been determined. Once this is determined and installed a map will appear containing pins showing all the reported locations where otter sightings in south Florida have occurred.

It may take until late 2024 to install the software and enter all the backlogged sighting data and the sighting reports received since launching this website.

Thank you for your patience. (Victor L. Camp)
