SSC Species Survival Commission
IUCN International Union for the Conservation of Nature
Species Survival Commission

The Major Role of the Species Survival Commission (SSC)

The Major Role of the Species Survival Commission are to:

- “Provide information to IUCN and the wider world on the conservation of species and on the inherent value of species in terms of ecosystem health and functioning, the provision of ecosystem services and the provision of support to human livelihoods; and”
- “Promote the conservation of species, thereby leading to measurable reductions in the loss of biodiversity.”
