## *Basic Ceramic Protection "Detail"*

*Keep Your Investment Protected and Looking Great!*

*A protection package using professional coatings to make your new car looking and feeling brand new for the long-term!*

### **PAINT PREP**

Vehicle is washed first with a cleaner to remove any iron deposits from being shipped on railroad cars, then paint is "clayed" to remove any stuck-on surface contaminants. Then an automotive-specific surface prep shampoo to safely remove dirt, grime, and any waxes or any other contaminants that might interfere with the ceramic application.

### **TIRE DRESSING**

Tires & Wheel wells are cleaned and dressed to a deep black luster with a ceramic-based silicone and solvent free dressing that is approved by all tire manufactures.

### **PLASTIC & RUBBER TRIM DRESSING**

All exterior plastic and rubber moldings and trim is cleaned, and UV protected. Due to off gassing of new plastics, the ceramic coating will be applied at the first maintenance visit for long-term protection and a deep luster.

### **PAINT POLISH AND CERAMIC COATING**

Paint is treated with an iron and rail dust remover to safely remove contaminants from shipping. Paint is then polished to remove and minor scratches and swirl marks that have been instilled from improper washing by the dealer (it happens). An 18-24 month ceramic coating is then applied for long term protection, gloss, and scratch resistance.

### **THOROUGH VACUUMING**

Complete interior is vacuumed to remove dirt and debris.

### **FLOOR MATS CLEANED AND PROTECTED**

Floor mats are removed and thoroughly cleaned then protected to repel spills and stains to keep them looking like new.

### **SEATS AND UPHOLSTRY**

An antimicrobial ceramic-based fabric protectant is applied to carpet and fabric seats to repel and spills and to block stains from setting in. Leather surfaces are cleaned and treated with a ceramic and antimicrobial coating to prevent stains and dye transfer from jeans etc....

Your leather will maintain its suppleness and luster, keeping it looking like the day it was rolled out of the factory. Any other leather trimmed pieces are also coated.

### **GLASS CLEANED INSIDE AND OUT**

All glass is thoroughly cleaned inside and out, including mirrors. Exterior glass is coated to repel water and road film. Think Rain-X®, but on steroids!

**Professional Detailing at YOUR Location with the value and  
quality you expect and the value you deserve!**
