Hands on supervised massage with record keeping (310 hours)

PROGRAM DESCRIPTION

This 570-hours massage therapy program is designed to teach students the principles of basic anatomy, physiology and structural kinesiology. This workshop is exceptional in providing core competencies essential for successful Massage Therapists. The workshop is structured and sequenced to provide students with an intrinsic knowledge, comprehension, and application of Massage Therapy techniques in order to be prepared to take the Hawai'i State Licensing Examination.

PROGRAM OBJECTIVES

The Massage Therapy Workshop prepares graduates for entry level positions in an array of different settings including, clinics, spas, health clubs, chiropractic offices and more.

The anatomy, physiology and structural kinesiology included in the curriculum are central in preparing graduates to work with other healthcare professionals and to intelligently discuss indications/contraindications and treatment plans for Massage Therapy techniques with clients.

This disclosure is to avoid confusion that may include misleading information such as, name of workshop that could imply approval by the Department of Education ("DOE"). The separate pathways are identified below:

Workshop training is a pathway toward partial qualification for licensure and is limited only to the academic course of study and not the practical/clinical training.

Institutional education from a DOE licensed school is another pathway. DOE school license requirements include general financial stability, adequacy of facility and equipment, preparation of school brochures and catalogs, surety bond requirements, fitness of school principal to operate a school, and may include a school inspection among other things.
