FOR YOUR SAFETY & BEST RESULTS:

MICROWAVE on high for 2-3 minutes until the plastic film fully “tents” into a dome and then self ventilates.

DO NOT TRY TO OPEN IMMEDIATELY !!!

VERY IMPORTANT--- Let the meal FULLY REST for 1-2 minutes after film deflation to allow the steam to release from the package. *This will also allow the film to continue to soften and peel away more easily.* Please visit:

www.tornapronfoods.com/products for more details.

Thank you!

PRO-TIP: *STOVETOP HEATING*

For Stovetop heating, slit the plastic in a “U” shape around the perimeter of the meal, peel plastic back and slide meal to a pre-heated (medium), lightly oiled skillet for 3-5 minutes stirring frequently until fully heated to 165-F. Plate & Enjoy!!
