# Explore the Comment Map

Default View

Legend

Click the blue boxes to toggle individual layers

Grayed out layers are not visible at the current scale. Zoom in or out to reveal

Click the arrow to reveal a dropdown menu with more detailed layer filters

The map features visible at your current scale are visible in the lower half of the legend panel.

You may need to scroll down in order to view additional legend data

Map Tools

Scroll with the mouse wheel or use the + and – buttons to zoom in or out on the map to view different details
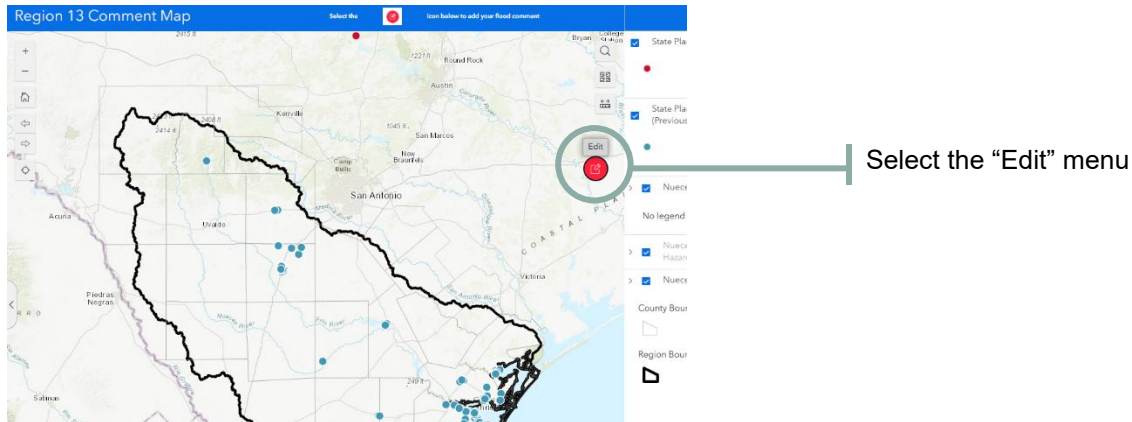

The house button returns the map to its default view

The arrows navigate between your previous map positions

The position button uses your device's GPS data to place the map view at your current location

Contribute New Information

Step 1: Open the Comment Map editor

Select the "Edit" menu

Step 2: Indicate Flood Comments (flood details) or New Feature (draw existing flood conditions)

Click to add a new comment or feature

Step 3: Identify, define, and submit your comment or feature

Click on the map to indicate marker location

Fill in relevant fields with appropriate information – scroll for more options or to upload files

Confirm your data to add it to the Comment Map
