Looking for a **CAREER** that pays well and offers opportunities for growth and advancement?

Changes in technology and consumer behavior continue to increase demand for jobs in supply chain management, warehouse distribution, and delivery.

With just 6 weeks training, you can earn credentials to help you start a career in the industry of supply chain logistics.

Planning Management Transport Inventory Packaging Distribution

1. Gain the knowledge and acquire the needed skills for entry-level employment in the industry including:
 - Material Handling and Equipment Operation (Forklift Certification)**
 - Team Work and Communication**
 - Global Supply Chain Logistics**
 - Quality Control Safety**
 - Computer Skills**

2. After completion of this section of the training you will test for your Certified Logistic Associate (CLA) certification issued by the Manufacturing Skill Standards Council (MSSC).

3. After you earn your CLA, you will have the opportunity to gain the mid-level technical knowledge of the industry and test for your Certified Logistics Technician (CLT) certification by learning:

Receiving	Inventory Control
Storage	Safe Handling Hazmat Materials
Order Processing	Dispatch and Tracking
Packaging and Shipping	Measurements and Metric Conversions

CERTIFIED LOGISTIC TECHNICIANS: Work in fulfillment centers, warehouses, distribution centers, and factories, and are involved in receiving, packing, shipping, tracking, and processing orders.
