Up Coming Logistics Training Classes for 2023

- January 9th- January 20th: Certified Logistics Associate Class
- January 16th- February 10th: Certified Logistics Technician Class

Looking for a **CAREER** that pays well and offers opportunities for growth and advancement?

Changes in technology and consumer behavior continue to increase demand for jobs in supply chain management, warehouse distribution, and delivery.

With just 6 weeks training, you can earn credentials to help you start a career in the industry of supply chain logistics.

1. Gain the knowledge and acquire the needed skills for entry-level employment in the industry including:
 - Material Handling and Equipment Operation (Forklift Certification)
 - Team Work and Communication
 - Global Supply Chain Logistics
 - Quality Control Safety
 - Computer Skills
2. After completion of this section of the training you will test for your Certified Logistic Associate (CLA) certification issued by the Manufacturing Skill Standards Council (MSSC).
3. After you earn your CLA, you will have the opportunity to gain the mid-level technical knowledge of the industry and test for your Certified Logistics Technician (CLT) certification by learning:
 - Receiving
 - Storage
 - Order Processing
 - Packaging and Shipping
 - Inventory Control
 - Safe Handling Hazmat Materials
 - Dispatch and Tracking
 - Measurements and Metric Conversions

CERTIFIED LOGISTIC TECHNICIANS: Work in fulfillment centers, warehouses, distribution centers, and factories, and are involved in receiving, packing, shipping, tracking, and processing orders.
