Below are files so you can study tablature.

Each page of tab is presented in two formats.

One is PDF for viewing and print. 🎵

The other is a TEF file. 🎵

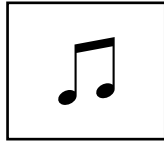

You download the free TEF Reader so you can listen to the audio version. It sounds like a toy but it's informative for your ear.

A note about the Tab”

These are really just documentation of the strings and frets. It’s not really music as in some tune or another. Just small phrases. Most are very short and we’re striving to develop an automatic pair of hands that will execute these textures faithfully. Linking the various short pieces in endless sequences will make your banjo ring.
