

South Virginia Street Safety Management Plan (SMP) Public Meeting

Formal presentation begins at 5:30pm

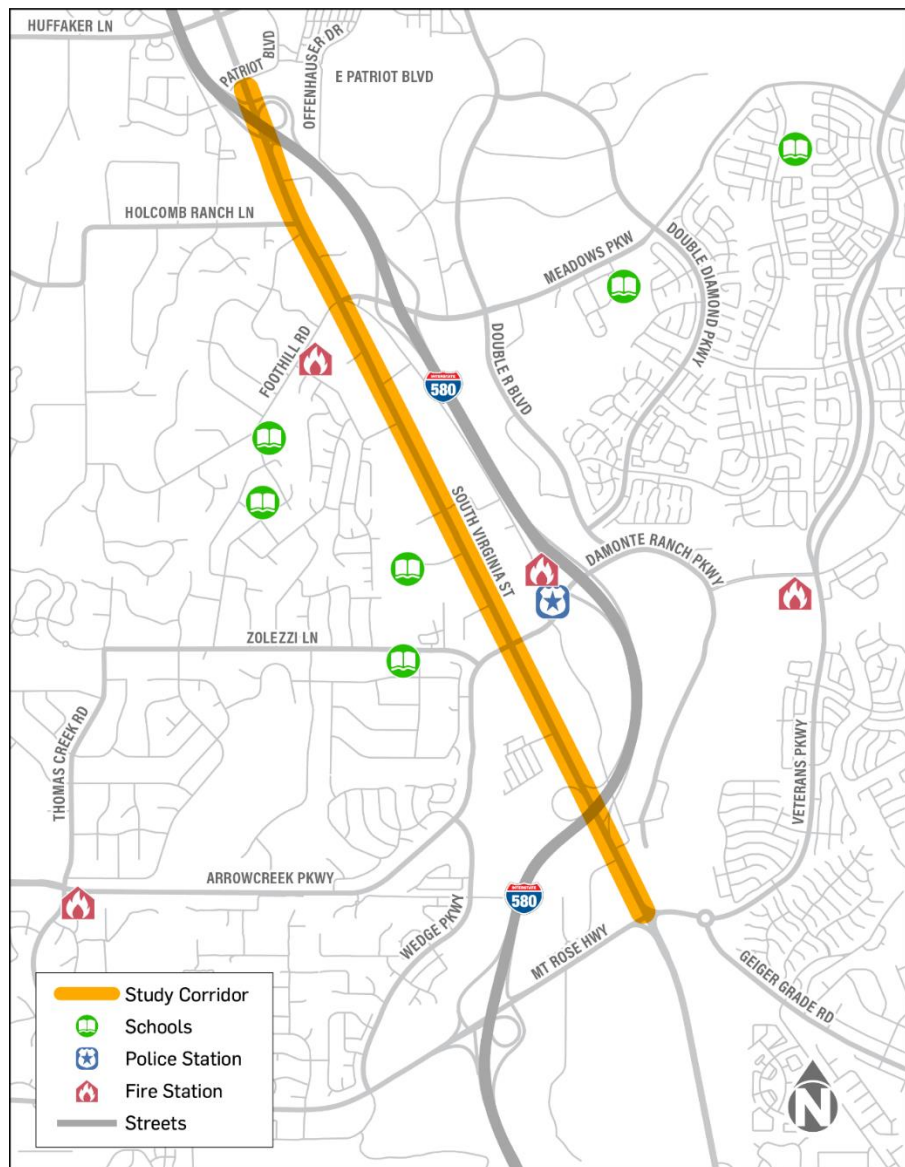

SouthVirginiaSafety.com

Welcome!

- Visit SouthVirginiaSafety.com
- This presentation will last approximately 15 minutes.
- There will be time for questions and answers (Q&A) following the presentation.
- After the Q&A, you are encouraged to walk around the room and learn more!

Study Corridor

South Virginia Street from E. Patriot Boulevard to Mt. Rose Highway

What is a Safety Management Plan?

- Identifies traffic safety issues and make recommendations for improvements.
- Part of NDOT's effort to eliminate traffic fatalities and serious injuries.
- Focuses on traffic **safety for all road users**

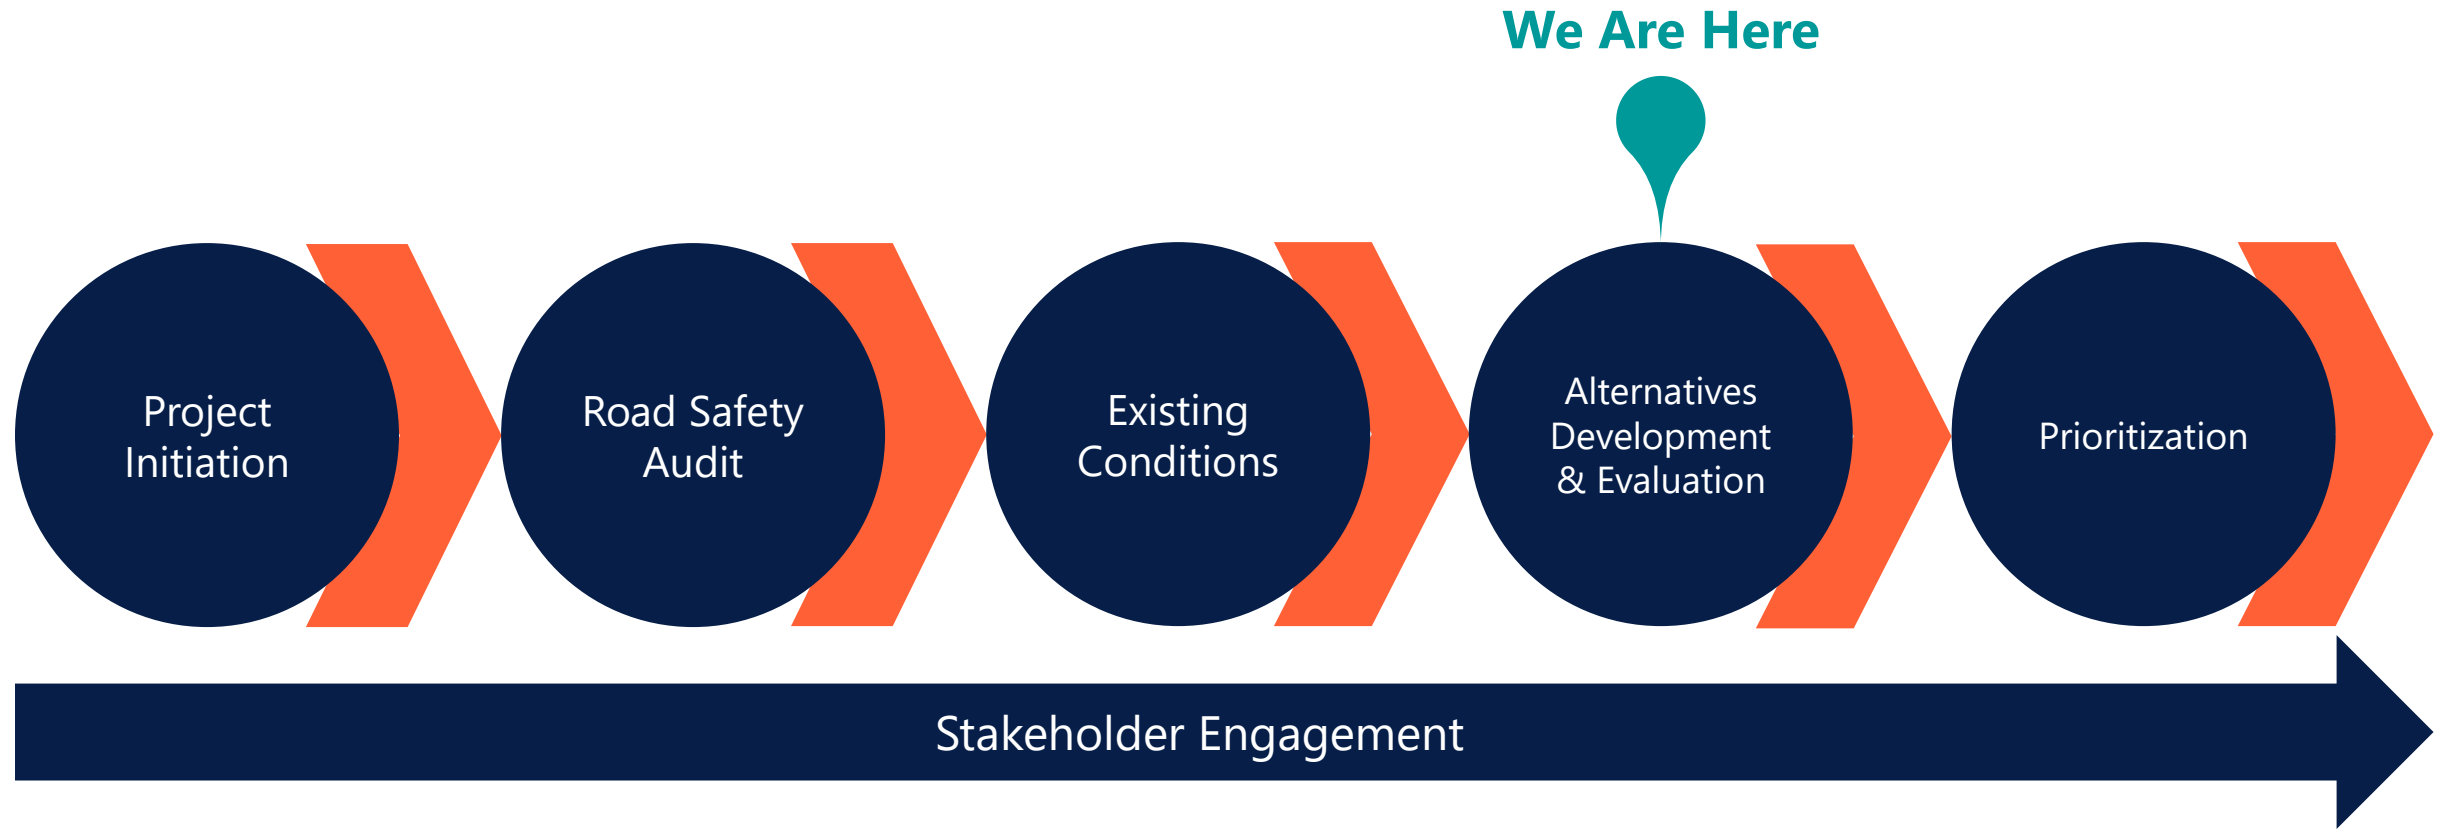

Why Study This Corridor?

Between 2015 and 2021:

- There were more than 300 crashes on South Virginia Street
- 5 people died
- 11 more were seriously injured

In 2023, 2 more pedestrians were killed.

Development of the SMP

Study Timeline

Key Safety Issues

Several factors impact traffic safety on South Virginia Street.

High Speeds

Missing Sidewalks

Left Turns

Sight Obstructions

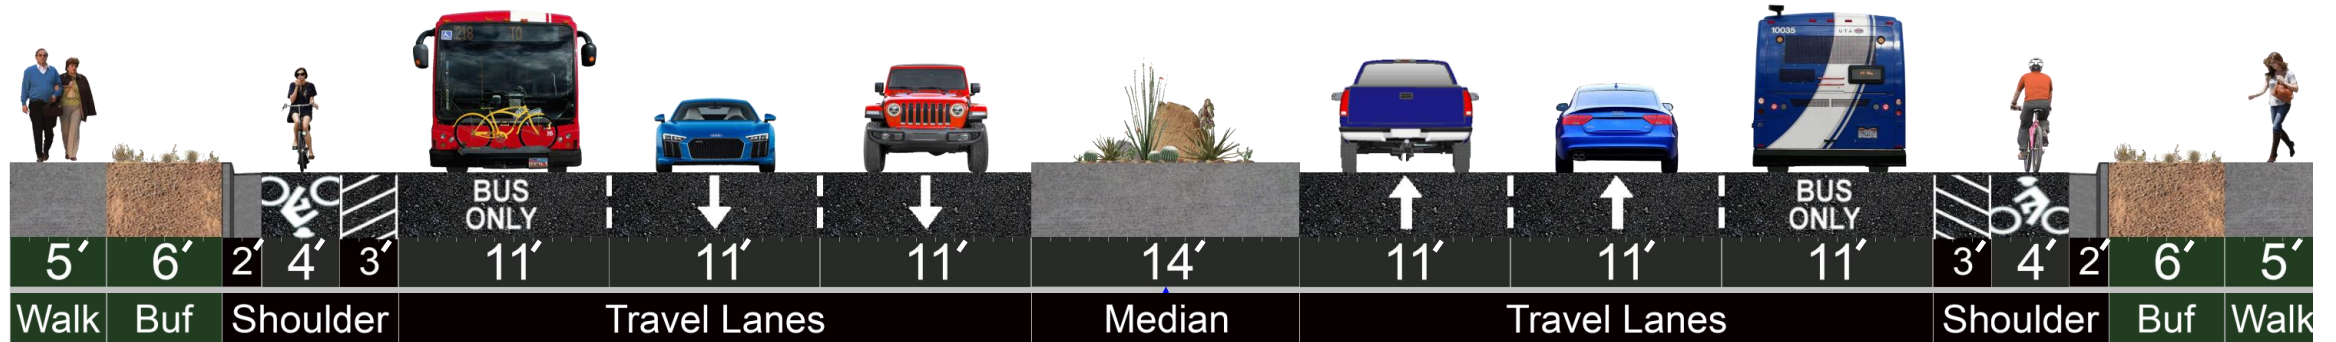

Limited Bicycle Facilities

Wide, Highway Like Road

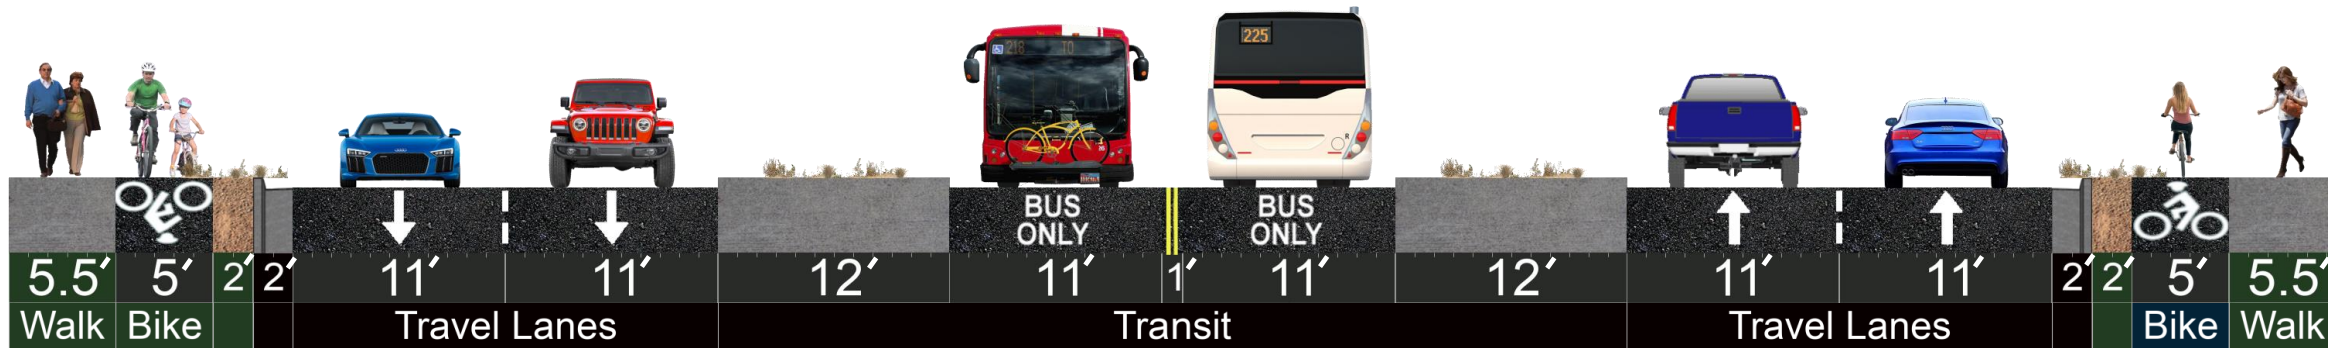

Proposed Side Running Transit Concept

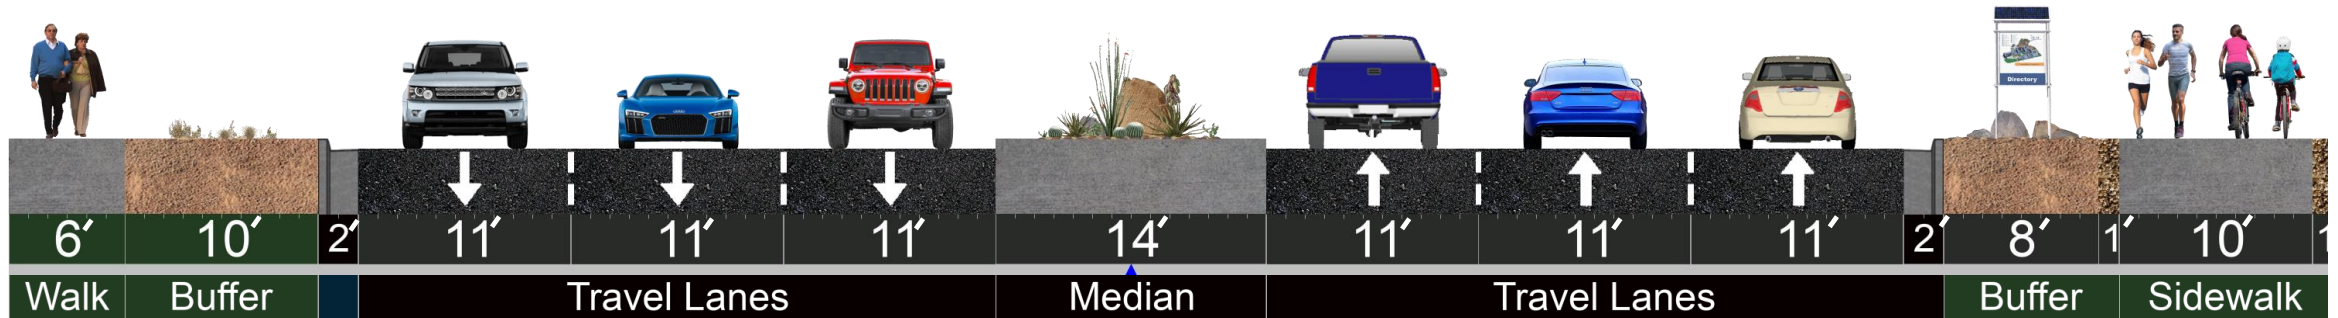

- Repurpose one travel lane in each direction for buses
- Add buffered bicycle lanes
- Add sidewalks to both sides of the street
- Add raised medians

Proposed Center Running Transit Concept

- Repurpose one travel lane in each direction for buses
- Add raised bicycle lanes (cycle track)
- Add sidewalks to both sides of the street
- Add raised medians

Proposed Recreational Trail Concept

- Add a multi-use path for pedestrians and bicyclists on one side of the street
- Add continuous sidewalk
- Add raised medians

Proposed Buffered Bicycle Lane Concept

- Repurpose one travel lane in each direction into a buffered bicycle lane
- Add sidewalks to both sides of the street
- Add raised medians

Next Steps
